Subject: Lecture on Bioethics in Dentistry

Dear faculty and students,

We are pleased to announce the commencement of a value-added course titled "Bioethics in Dentistry" at DY PATIL DENTAL SCHOOL. The course aims to supplement the existing curriculum by offering additional knowledge and practical skills that will further enrich the learning journey of our students. I request the HODs to allow the students to attend the value-added course on the above-mentioned day from 9.30 am – 4.00 pm at lecture hall no 4.

Please find the details of the course:

Course Title: Lecture on Bioethics in Dentistry

Duration: 3 days

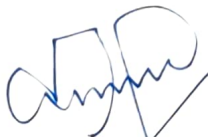

Venue: DY PATIL DENTAL SCHOOL

Schedule: 12/10/2023 to 14/10/2023

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli
Dean, DYPDS

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

Bioethics
19/10/2023

Eligibility criteria: IV BDS and INTERNS

Introduction:

The purpose of this course is to introduce students to bioethics by discussing a few contemporary issues. To understand and appreciate them we need to adopt an interdisciplinary approach where biological, medical, philosophical and sociological aspects have to be considered. In actual contexts practitioners often have to negotiate with a number of issues which have cultural and religious implications and they may have to communicate these implications to patients who belong to different social backgrounds. This course addresses some of such issues and explores the ways in tackling them.

This class is an overview of varying philosophical perspectives in bioethics (bioethics includes medical, environmental, and animal ethics), with a particular focus on medical ethics. Medical ethics is an advancing field amongst professional philosophers and professionals working in the healthcare field, e.g., physicians, nurses, hospital managers, and caretakers. The healthcare world is teeming with ethical problems, and resolving these problems involves special coordination that is not always necessary in other moral areas of life. When individuals run into ethical dilemmas in their personal lives, deciding them is often up to them alone. However ethical dilemmas in medicine and healthcare almost always demand coordination between medical professionals, the patients themselves, and family members/loved ones; each person/group of persons has different areas of expertise and experience. Disagreements can be intense and hard to resolve because of such differences. It is so hard that many hospitals now have their own team of professional ethics consultants. Bioethics consultants usually have undergone philosophical training focused on ethical principles, incredibly unique ethical principles identified as especially important for the medical domain. This class will delve into these principles and their philosophical foundations and then apply them to real-life medical

problems. The course involves an ethical discussion about common medical dilemmas in various circumstances. After this course, students should have a breadth of knowledge concerning medical ethics in general and an even more profound understanding of some significant historical and contemporary debates, including freedom of conscience, surrogate decision-making and mandating vaccinations. In addition, students are expected to demonstrate their ability to engage in professional discussion relevant to the course readings, lectures, and assignments. This course has been bifurcated into two primary focuses: general bioethical principles and theories. Principles and theories are general rules and guidelines that help us understand various situations. An example of an ethical guideline is, "Do not lie without a good reason." This guideline helps us consider whether or not to tell a lie. A medical ethics guideline, such as "keep the patient informed," would be specific to medical ethics." Second, the course involves a philosophical analysis of real-life medical dilemmas. We will often focus on two opposing viewpoints concerning a specific ethical quandary, and students will practice raising points for and against each possibility.

Course Objectives:

Upon completion of this course, you should be able to:

1. Utilize a systematic framework for evaluating the ethics of a clinical research protocol.
2. Identify, define, and consider ethical issues in the conduct of human subject research.
3. Apply appropriate codes, regulations, and other documents governing the ethical conduct of human subject research to their own research.
4. Describe the purpose, function, and challenges of IRBs.
5. Identify the critical elements of informed consent and strategies for implementing informed consent for clinical research.
6. Identify and apply relevant considerations for assessment of research risks and benefits.
7. Explore the ethical requirement of fair subject selection and its application.
8. Appreciate ethical challenges with conducting international collaborative research in low- and middle-income countries.

Learning Outcomes

1. Students should develop an in-depth understanding of several critical issues in contemporary medical ethics.
2. Students should critically engage with the readings to identify potential problems with the author's arguments and positions. Throughout the course, critical reading skills should improve.
3. Students should begin to develop autonomous ideas about medical ethics to the point that they can defend their own opinions, ideally, opinions that are different from those already expressed in the literature.
4. Throughout the course, students should practice and improve upon, their ability to have philosophical discussions with their classmates. Skills involved in this endeavor include the ability to critique the views of others politely, and the ability to point out ways in which the ideas of others could be improved.

Contents:

1. Evolution of bioethics
2. Bioethics today: culture democracy and law
3. Ethical theories and bioethical issues
4. Ethics of care
5. Technological advancements and bioethical concerns

Schedule:

Sr No	Topic	Method	Facilitator	Date	Time
1.	Introduction to Bioethics	Lecture	Dr Karibasappa	12/10/2023	9:00 AM - 10:30 AM
2.	Ethical Issues in Clinical Practice	Lecture	Dr Kulkarni Shriram	12/10/2023	10:30 AM - 12:30 PM
3.	Research Ethics	Lecture	Dr Karibasappa	12/10/2023	1:30 PM - 3:00 PM
4.	Ethical Issues in Emerging Technologies	Group Discussions	Dr Kulkarni Shriram	12/10/2023	3:00 PM - 4:00 PM
5.	Ethical Issues in Public Health	Lecture	Dr Karibasappa	13/10/2023	9:00 AM - 11:00 AM

DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS

VALUE ADDED COURSE

TITLE: ADVANCED DIAGNOSIS IN ORTHODONTICS: ENHANCING TREATMENT PLANNING

Course Description:

The Value-added course in Orthodontics is designed to provide participants with comprehensive knowledge and practical skills in the field of orthodontics. Participants will learn about the principles of orthodontic diagnosis, treatment planning, and appliance design through interactive lectures, hands-on workshops, and clinical demonstrations. This course aims to enhance participants' understanding of orthodontic techniques and their application in clinical practice.

Course Objectives:

1. To familiarize participants with the fundamentals of orthodontic diagnosis and treatment planning.
2. To provide hands-on experience in orthodontic appliance fabrication and adjustment.
3. To enhance participants' skills in managing common orthodontic cases.
4. To introduce participants to the latest advancements and techniques in orthodontics.
5. To improve participants' confidence in providing orthodontic care to patients.

Learning Outcome:

Students will master advanced diagnostic tools like 3D imaging and cephalometric analysis for precise orthodontic assessments. Learners will interpret complex cases, formulating tailored treatment plans. They will integrate insights from multiple disciplines for effective problem-solving and apply evidence-based principles in clinical decisions to deliver top-notch orthodontic care.

Course Content:

Fundamentals of Orthodontic Diagnosis

- Overview of Orthodontic Diagnosis
- Clinical Examination Techniques
- Diagnostic Imaging Modalities
- Hands-on Workshop: Clinical Examination and Diagnostic Imaging

Advanced Diagnostic Tools and Techniques

- Digital Diagnostic Tools
- Advanced Diagnostic Parameters
- Case-Based Learning: Analysis of Complex Cases
- Interactive Discussions and Problem-Solving Sessions

Practical Application and Treatment Planning

- Occlusal Analysis and Treatment Objectives
- Interdisciplinary Diagnosis and Treatment Planning
- Treatment Simulation and Virtual Planning
- Case Presentations and Conclusion

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Course Schedule:

DAY 1

	Time	Topic	Facilitator
		Fundamentals of Orthodontic Diagnosis	
13/07/23	9:00AM - 9:30AM	Registration and Introduction to the Course	Dr Jayshree Manikandan
	9:30AM - 10:30AM	Overview of Orthodontic Diagnosis -Importance of thorough diagnosis in orthodontic treatment planning - Key components of a comprehensive diagnosis	
	10:30AM - 12:00AM	Clinical Examination Techniques - Assessment of dental and skeletal relationships - Examination of facial aesthetics and soft tissue profiles	
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Diagnostic Imaging Modalities -Radiographic assessment: X-rays, cephalometric analysis - 3D imaging techniques: CBCT, intraoral scanning	Dr Suyog S
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Hands-on Workshop: Clinical Examination and Diagnostic Imaging -Practice sessions on performing clinical examinations - Interactive demonstrations of diagnostic imaging techniques	

Day 2:

Date	Time	Topic	Facilitator
		Advanced Diagnostic Tools and Techniques	
14/07/23	9:00AM - 10:30AM	Digital Diagnostic Tools -Utilization of digital models for diagnosis and treatment planning -Integration of software tools for digital analysis	Dr Shailesh Dongre

	10:30AM - 12:00AM	Advanced Diagnostic Parameters -Assessment of growth patterns and facial asymmetries - Evaluation of airway dimensions and functional considerations	
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Case-Based Learning: Analysis of Complex Cases - Review and analysis of challenging orthodontic cases - Identification of diagnostic nuances and treatment planning considerations	Dr Arun Mhaske
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Interactive Discussions and Problem-Solving Sessions - Group discussions on diagnosis and treatment planning strategies - Addressing participant queries and case-specific challenges	

Day 3:

Date	Time	Topic	Facilitator
		Practical Application and Treatment Planning	
15/07/23	9:00AM - 10:30AM	Occlusal Analysis and Treatment Objectives - Interpretation of occlusal relationships and functional considerations - Setting treatment goals and objectives based on diagnosis	Dr Varsha Merani
	10:30AM - 12:00AM	Interdisciplinary Diagnosis and Treatment Planning - Collaboration with other dental specialists: periodontics, prosthodontics, oral surgery - Integration of interdisciplinary considerations into treatment plans	
	12:00PM -12:30 PM	Lunch Break	

	12:30 PM -2:00 PM	Treatment Simulation and Virtual Planning - Utilization of virtual treatment planning software - Simulation of treatment outcomes and patient communication	Dr Sandeep Jethé
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Case Presentations and Conclusion - Participants present their diagnostic findings and treatment plans - Summary of key takeaways and future directions in orthodontic diagnosis

Circular

Value added course on the topic “Dental Intelligence Redefined: Navigating ChatGPT in Your Dental Studies” will be conducted on 5th to 7th October

2023. All the Third Year Students are instructed to attend the programme. Interested staff members can attend the programme. All the HOD's are informed to thus make required clinical arrangements for the same.

Please find the details below-

Venue: -Lecture Hall no.1

Time – 9.30 am - 3.30 pm

Speaker – Dr Pritesh Gawali

Dr Anand Shigli
DEAN

Value added course

Title - Dental Intelligence Redefined: Navigating ChatGPT in Your Dental Studies

INTRODUCTION

In an era characterized by rapid technological advancements, the integration of Artificial Intelligence (AI) is reshaping every facet of our lives, including the field of dentistry. As aspiring dental professionals, it is imperative for us to embrace these innovations and harness their potential to enhance our learning experiences and clinical practices.

The Intersection of AI and Dentistry

Artificial Intelligence, once confined to the realm of science fiction, has now become a tangible reality with profound implications for oral healthcare. From diagnostic imaging to treatment planning and patient management, AI technologies are revolutionizing the way dental professionals approach their craft. At the forefront of this AI revolution stands ChatGPT, a cutting-edge language model developed by OpenAI, capable of generating human-like text based on input.

Unlocking the Potential of ChatGPT

In this course, we embark on a journey to explore the transformative power of ChatGPT in redefining dental intelligence. By leveraging ChatGPT's capabilities, we will delve into innovative ways to enhance our understanding of dental concepts, streamline our study workflows, and elevate the quality of our academic and clinical endeavors.

Course Objectives

The course is designed for 1st year BDS students. Throughout this course, our objectives include:

- Introducing participants to the fundamentals of Artificial Intelligence and its relevance to dentistry.

- Familiarizing participants with ChatGPT and its applications in dental education and practice.
- Providing hands-on experience and practical guidance on utilizing ChatGPT for various learning and research tasks in dentistry.

Empowering Dental Professionals of Tomorrow

As future leaders in the field of dentistry, it is incumbent upon us to adapt to emerging technologies and embrace new paradigms of learning and practice. By mastering the use of ChatGPT as a tool for dental intelligence, we not only equip ourselves with the skills necessary to thrive in a rapidly evolving landscape but also pave the way for innovation and excellence in oral healthcare delivery.

Objectives

1. Introduction to Artificial Intelligence (AI) in Dentistry:

- Understand the fundamentals of AI and its applications in the field of dentistry.
- Explore how AI technologies, including ChatGPT, are transforming dental education and practice.

2. Familiarization with ChatGPT:

- Gain an in-depth understanding of ChatGPT and its capabilities in generating human-like text based on input.
- Learn how ChatGPT processes information and generates responses relevant to dental concepts and terminology.

3. Applications in Dental Studies:

- Discover various ways to leverage ChatGPT as a study aid and research tool in dental education.
- Explore how ChatGPT can assist in generating case presentations, treatment plans, and literature reviews relevant to dental studies.

4. Hands-on Experience and Practical Guidance:

- Gain practical experience through hands-on sessions, interactive exercises, and demonstrations utilizing ChatGPT.
- Receive guidance on effectively formulating queries, interpreting responses, and integrating ChatGPT into dental study workflows.

Learning outcomes

Demonstrate an understanding of Artificial Intelligence (AI) fundamentals and their relevance to dentistry.

2. Describe the capabilities of ChatGPT and its role in generating human-like text for dental study purposes.
3. Utilize ChatGPT effectively as a study aid for reviewing and comprehending complex dental concepts and terminology.
4. Generate case presentations and treatment plans with assistance from ChatGPT, demonstrating proficiency in applying AI technologies to dental practice scenarios.
5. Conduct literature reviews and research tasks using ChatGPT-generated content, showcasing the ability to integrate AI tools into academic pursuits in dentistry.
6. Demonstrate practical skills in formulating queries, interpreting responses, and interacting with ChatGPT to facilitate learning and research in dental studies.

Course Content

Module 1: Introduction to Artificial Intelligence in Dentistry

- Overview of Artificial Intelligence (AI) and its significance in dentistry
- Applications of AI in dental education, practice, and research
- Introduction to ChatGPT and its role in redefining dental intelligence

Module 2: Understanding ChatGPT

- Fundamentals of ChatGPT: architecture, training, and functionality
- How ChatGPT processes information and generates human-like text
- Key features and capabilities of ChatGPT relevant to dental studies

Module 3: Applications of ChatGPT in Dental Education

- Using ChatGPT as a study aid: reviewing dental concepts and terminology
- Generating case presentations and treatment plans with ChatGPT assistance
- Conducting literature reviews and research tasks using ChatGPT-generated content

Module 4: Practical Hands-on Session

- Live demonstration of interacting with ChatGPT for dental study tasks
- Step-by-step guidance on formulating queries and interpreting responses
- Practice sessions for participants to engage with ChatGPT and explore its capabilities

Schedule

Day 1:

Session 1: Introduction to AI in Dentistry and ChatGPT (9:30 am– 12:45 pm)

- 9:30 -9:45 am : Pre-Test
- 9:45-11:15 am: Overview of AI fundamentals and its relevance to dentistry.
- 11:15- 12:45pm: Exploring the role of AI in dental education, practice, and research.

Session 2: Understanding ChatGPT (12:45 -3:30 pm)

- 12:45-2:15 pm: Introduction to ChatGPT: architecture, functionality, and potential impact on dental studies.
- 2:15-3:30 pm: How ChatGPT processes information, generates human-like text, and its capabilities in dental contexts.

Day 2:

Session 1: Applications of ChatGPT in Dental Studies (9:30-12:30 pm)

- 3 hours: Using ChatGPT as a study aid: reviewing dental concepts, terminology, and procedures.

Session 2 : Live demonstration and practical exercises (12:30-3:30 pm)

- 3 hours: Live demonstration and practical exercises for participants to engage with ChatGPT and explore its functionalities.

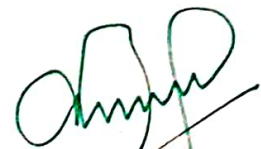

Day 3:

Session 1: Hands-on Practice Session (9:30am -3:30 pm)

- 9:30 – 1:00pm: Generating case presentations and treatment plans with ChatGPT assistance.
- 1:00-3:30 pm - Post Test and Discussion.

Subject: "Advances in Periodontal Surgery -VALUE-ADDED COURSE LASER"

Dear faculty & Interns,

We are pleased to announce the commencement of a value-added course titled "Advances in Periodontal Surgery -VALUE-ADDED COURSE LASER" at DY Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of periodontology

Please find below the details of the course:

Course Title: Advances in Periodontal Surgery -VALUE-ADDED COURSE LASER

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 15th May 2023 to 17th May 2023

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

DEPARTMENT OF PERIODONTOLOGY

Advances in Periodontal Surgery -VALUE-ADDED COURSE LASER

Introduction:

Many new technologies are being evolved to assist the clinician and to enhance the outcome of periodontal therapy. Lasers and have been increasingly employed in periodontics.

LASER:

It stands for Light Amplification by Stimulated Emission of Radiation.

It functions by transmitting light energy into the tissues.it is collimated and monochromatic rays of light.

Indications of Laser in day-to-day practice involves gingivoplasty, gingivectomy, gingival depigmentation, scaling, and management of dentinal hypersensitivity, peri-implantitis and many more.

Significance in dentistry:

Technology is constantly advancing with new research to provide the clinician with better therapy rendered to patients. Lasers have become an integral part of periodontal therapy. Clinician considering incorporating these modes of treatment modalities should be familiar with what is known, parameters to be used and receive adequate training to master these modes of treatment modalities.

Objectives:

- To orient interns to Lasers.

Duration: 15 Hrs.

Eligibility: Interns.

Selection method: Compulsory for all interns.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Course content:

1st Day	Brief introduction to: Piezosurgery Loupes. (Lecture)	Brief introduction to Microscope. (Lecture)
2nd Day	3hrs Theory discussion (LASERS)	3hrs laser Demo and Practice
3rd Day	3hrs Theory discussion (LASERS)	3hrs Demo and Practice.

Resource Literature:

Sr No.	Name of Staff	Topic
1.	Dr. Girish Byakod	Laser (Lecture and Demo.)
2.	Dr. Parag Hadge	Piezosurgery
3.	Dr. Rakesh Mutha	Loupes and
4.	Dr. Sachin Bhagat	Microscope.

Basics of MagVision Microscopic Imaging software

Subject: Value Added Course - "Basics of MagVision Microscopic Imaging Software"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled "Basics of Magvision Microscopic imaging Software" at DY Patil Dental School.

Please find below the details of the course:

Course Title: "Basics of MagVision Microscopic imaging Software"

Duration: 6 days

Schedule: 10th May 2023 to 17th May 2023

Attendance: Attendance for all sessions is mandatory.

Venue: DY Patil Dental School

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

Basics of MagVision Microscopic Imaging software

Introduction:

This course aims to equip BDS students with essential skills in utilizing MagVision software for enhancing their microscopic imaging capabilities, thereby enabling them to make more accurate diagnoses and informed treatment decisions in dental practice. The course was conducted during the regular postings of students.

Objectives

1. Intern should be able to install Magvision software
2. Intern should be able to use all tools menus in Magvision software.
3. Intern should be able to capture image using Magvision software.

Learning outcomes:

Upon completion of the course, participants will be able to –

- Understand MagVision software and its importance in dental microscopy.
- Understand the interface and basic functions of MagVision.
- Understand the practical applications of MagVision in histopathology.

Course content

- Introduction to MagVision: Purpose and significance in dental practice.
- Installing and setting up MagVision software.
- Navigating the user interface: Tools, menus, and customization options.
- Image capture techniques using MagVision: Adjusting focus, zoom, and illumination.
- Basic image processing functions: Cropping, rotating, and adjusting brightness/contrast.
- Saving and exporting images in various formats.

Attendance:

Attendance will be monitored, and students are required to meet the minimum attendance criteria to be eligible for certification.

Attendance for all sessions is mandatory.

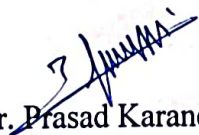

Certification:

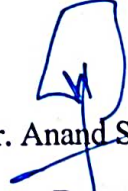

After Successful completion of the Value-Added Course the student will be acknowledged with a certification.

Schedule: Basics of MagVision Microscopic Imaging software

Sr. no	Topic	Method	Facilitator	Date	Time
1.	Introduction to MagVision: Purpose and significance in dental practice.	Lectures and group discussions	Dr. Prasad Dr. Mrunal Dr. Rucha	10/05/23	9-12
2.	Installing and setting up MagVision software.	Demonstrations and lectures	Dr. Prasad Dr. Mrunal Dr. Rucha	11/05/23	1-4
3.	Navigating the user interface: Tools, menus, and customization options.	Demonstrations and lectures	Dr. Prasad Dr. Mrunal Dr. Rucha	12/05/23	9-12
4.	Image capture techniques using MagVision: Adjusting focus, zoom, and illumination.	Demonstrations and lectures	Dr. Prasad Dr. Mrunal Dr. Rucha	14/05/23	9-12
5.	Basic image processing functions: Cropping, rotating, and adjusting brightness/contrast	Demonstrations and lectures	Dr. Prasad Dr. Mrunal Dr. Rucha	16/05/23	9-12
6.	Saving and exporting images in various formats.	Demonstrations and lectures	Dr. Prasad Dr. Mrunal Dr. Rucha	17/05/23	9-12

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

Tooth Preparation: Isolation In Dentistry- Rubber Dam Now Or Never

INTRODUCTION:

This course provides the comprehensive knowledge and practical skills in the application and benefits of isolation in dentistry. Tailored for dental students, this program enriches expertise in managing routine endodontic procedures by integrating Rubber dam day-to-day practice. Covering crucial concepts, techniques, and hands-on training, it optimizes the execution of root canal treatments.

Indications:

- The students who have mastered routine endodontic procedure techniques.
- The students who want to practice private clinic

Significance in Endodontics:

The Rubber Dam course in dentistry holds significant importance for both dental professionals and patients alike. Here are some key reasons why mastering rubber dam usage is crucial in modern dentistry:

- 1) **Infection Control:** Rubber dam isolation provides an effective barrier between the operative field and the oral cavity, significantly reducing the risk of contamination from saliva, blood, and other oral fluids.
- 2) **Enhanced Visibility:** Better visibility leads to improved accuracy in cavity preparation, restoration placement, and other treatment modalities, ultimately resulting in better outcomes for patients.
- 3) **Patient Comfort:** Patients often experience greater comfort during procedures performed with rubber dam, leading to a more positive dental experience overall.
- 4) **Improved Treatment Quality:** With better isolation and visibility, dental practitioners can perform procedures with greater accuracy and confidence.

5) **Efficiency and Time-Saving:** Rubber dam isolation can streamline workflows, reduce chairside time, and minimize the need for additional re-treatments, ultimately leading to a more productive dental practice.

6) **Professional Image:** Dental professionals who incorporate rubber dam isolation into their procedures convey a high standard of care and professionalism to their patients, which can enhance patient trust and satisfaction.

7) **Versatility:** Dental professionals who are proficient in rubber dam placement have a versatile tool at their disposal to improve the quality and scope of services they offer to their patients

Learning Outcome:

To educate dental professionals on incorporating rubber dam as isolating method in routine endodontic procedures for precision and accuracy in treatment. It aims to enhance their skills in performing treatment and minimizing procedural errors.

Course content:

1 st Day	Fundamentals of Isolation
2 nd Day	Rubber dam kit
3 rd Day	Advances in Isolation

Schedule: The course will be conducted over 3 days from 9/3/2023 to 11/3/2023 at the Department of Conservative Dentistry and Endodontics. The course consists of interactive lectures, case presentation & group discussion with live demonstration & hands on.

Attendance : Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule: Isolation In Dentistry- Rubber Dam Now Or Never

Sr No	Topic	Method	Facilitator	Date	Time
1	Fundamentals of Isolation 1: Introduction to Isolation 2: Principles of Isolation 3: Various Isolating techniques	Lectures & Group Discussion	Dr Pradeep Dr Nirranjan Dr Nirranjan	9/3/2023	9-12
2	Rubber dam kit 4: Introduction to kit 5: Rubber dam kit application 6: Clinical Scenarios	Live demonstration & Hands On	Dr Pradeep Dr Nirranjan Dr Nirranjan	10/3/2023	9- 12.30
3	Advances in Isolation 7: Modification in Isolation methods 8: Clinical Decision-Making 9: Practice Session – Application of Rubber dam	Lectures, Group Discussion & Hands on	Dr Pradeep Dr Nirranjan Dr Nirranjan	11/3/2023	9-12.30

Date – 30/12/2022

Circular

This is to inform all the HODs and faculty that we are introducing a new two-day value-added course '**Basic Life Support**' for 1st year B.D.S. and 1st year PG students. The course will be conducted by Dept. of OMFS in collaboration with Bharati Vidyapeeth Dental College, Pune.

The course details for current batch are as follows:

Date – 13th-14th Feb, 2023(Monday-Tuesday)

Time – 9:00 am – 5:00 pm

Venue – New PG Library (2nd floor)

Course Co-Ordinator – Dr. Vikram Karande, HOD, OMFS (Mob No. 9137072340)

Eligibility – 1st year BDS and 1st year M.D.S. students

Capacity – 30 candidates per batch.

Course fees – Rs 3047 /-

Please contact the course coordinator to order study material for the course.

BASIC LIFE SUPPORT - VALUE-ADDED COURSE (2022-23)

Brochure

Introduction:

Basic Life Support (BLS) course is tailored specifically for dental students as a specialized program designed to equip dental students with essential skills to respond effectively in critical situations within the dental setting. This course recognizes the unique challenges and scenarios that dental professionals may encounter, emphasizing the importance of quick and proficient action in emergencies.

Basic Life Support is a vital set of techniques crucial for preserving life during unexpected medical events, such as cardiac arrest, respiratory distress, or other emergencies that may arise in a dental setup.

Significance of conducting BLS course in dental school:

This course will empower future dentists with the knowledge and hands-on experience necessary to confidently handle life-threatening situations within the dental environment.

Led by experienced instructors who understand the unique demands of dental practice, this course will provide the students with a supportive and specialized learning environment. Emphasizing teamwork and effective communication, we aim to prepare them for the specific challenges that may arise in a dental emergency.

Objectives:

- To train the students and interns to identify Medical Emergencies which may occur on dental chair.
- To make them aware of modalities used to manage medical emergencies happening in dental office.

- To provide comprehensive & intensive hands-on training (on specialized mannequins) of international standard to the PG students and Interns in Basic Life support (BLS) in order to attempt saving lives.

Duration: 16 hrs divided in a 2 days module

Started since: February 2022-23

Intake: 30 trainees at a time

Eligibility:

1st BDS and 1st year PG students

Selection method:

Voluntary Registrations

Program Co-ordinator: —————

Dr. Vikram Karande, Professor and HOD, Dept. of OMFS

Faculty:

Dr. Prasad Dadhe and Team, Bharti Vidyapeeth Hospital

Dr. Pratik Hande, Associate Professor, Dept. of OMFS

Dr. Kapil Kshirsagar, Associate Professor, Dept. of OMFS

Dr. Vaishali Pagare, Lecturer, Dept. of OMFS

Dr. Neha Harankhedkar, Lecturer, Dept. of OMFS

Course Schedule:

Day 1

Sr. No.	Content	Duration	Staff
1.	Introduction and Basic Concepts and CPR 1. Welcome and Course Overview 2. Importance of Basic Life Support (BLS) 3. Legal and Ethical Considerations in Emergency Care 4. Chain of Survival 5. Anatomy and Physiology of the Cardiovascular System 6. Recognizing Cardiac Arrest 7. Chest Compressions Techniques 8. Rescue Breathing (for healthcare professionals) 9. Adult CPR Scenarios and Practice	8:00 am to 12:00 pm	Dr. Prasad Dadhe, Dr. Vikram Karande
2.	1. Introduction to AEDs 2. AED Operation and Safety 3. AED Demonstration and Practice 4. Special Considerations for AED Use (e.g., pediatric patients)	1:00 pm to 5:00 pm	Dr. Prasad Dadhe

Day 2

Sr. No.	Content	Duration	Staff
1.	Airway Management and Advanced CPR Techniques: 1. Two Rescuers CPR 2. Special Considerations e.g. Pregnant patients 3. Airway Anatomy 4. Techniques of Opening and Maintaining Airway 5. Recognizing and Managing Choking in Adults and Children	8:00 am to 12:00 pm	Dr Vasanta
2.	Specialized Scenarios: 1. Common Medical Emergencies (e.g., stroke, heart attack) 2. Allergic Reactions and Anaphylaxis 3. Injury Assessment and Management 4. Final Skills Assessment and Scenario Practice	1:00 pm to 5:00 pm	Dr Shaikh

Subject: Value-added course - "Advanced Course in Implant Prosthodontics"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled "Advanced Course in Implant Prosthodontics" at DY Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of restorative dentistry and prosthodontics.

Please find below the details of the course:

Course Title: Advanced Course in Implant Prosthodontics

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 10th October 2022 to 12th October 2022

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

Dean

DEPARTMENT OF PROSTHODONTICS & IMPLANTOLOGY

Title: Advanced Course in Implant Prosthodontics

Overview:

This value-added course aims to equip BDS interns in India with comprehensive knowledge and practical skills in implant prosthodontics. Implant dentistry is a rapidly growing field offering innovative solutions for replacing missing teeth and restoring oral function and aesthetics. This course will provide interns with the expertise necessary to confidently diagnose, plan, and execute implant-supported prosthodontic treatments, enhancing their capabilities and employability in the dental field.

Course Objectives:

1. Understand the principles and fundamentals of implant dentistry.
2. Gain proficiency in treatment planning for implant-supported prostheses.
3. Develop skills in surgical implant placement and bone augmentation techniques.
4. Master the selection and fabrication of implant-supported restorations.
5. Learn about the maintenance and management of implant cases.

Learning Outcome:

The learning outcomes of the Advanced Course in Implant Prosthodontics are designed to ensure that participants acquire the necessary knowledge, skills, and competencies to excel in the field of implant dentistry. Upon completion of the course, participants will be able to:

1. Demonstrate a comprehensive understanding of the principles and fundamentals of implant dentistry, including the history, evolution, and basic anatomy of osseointegration.
2. Effectively assess and evaluate patients for implant treatment, employing radiographic evaluation and diagnostic imaging techniques to develop personalized treatment plans.

3. Competently perform surgical implant placement and bone augmentation procedures, adhering to principles of aseptic technique and surgical site preparation.
4. Select appropriate implant components and design custom abutments for optimal esthetics and function and fabricate and cement implant-supported crowns and bridges.
5. Apply evidence-based protocols for postoperative care and follow-up, including the management of peri-implant diseases and complications, and educate patients on oral hygiene and maintenance of implant restorations.
6. Engage in critical thinking and problem-solving skills when faced with challenges or complications in implant treatment, demonstrating the ability to adapt and provide appropriate solutions.
7. Collaborate effectively with multidisciplinary teams, including surgeons, prosthodontists, and dental technicians, to deliver comprehensive and patient-centred implant care.
8. Demonstrate professionalism and ethical conduct in all aspects of implant dentistry practice, adhering to established standards and guidelines for patient care and treatment.
9. Apply acquired knowledge and skills in clinical practice through supervised hands-on training, effectively integrating theory into practical application.
10. Continuously seek opportunities for professional development and lifelong learning in the field of implant dentistry, staying abreast of advancements and emerging trends to deliver the highest quality of care to patients.

Schedule:

Sr No	Topic	Method	Facilitator	Date	Time
	Module 1: Introduction to Implant Dentistry				
1	History and evolution of implant dentistry	Lecture, Interactive Discussion with Case Studies	Dr Kamal	10-10-2022	9.15-10.00
2	Basic anatomy and physiology of osseointegration		Dr Paulami		10.00-10.45
3	Biomechanical principles of implant-supported prostheses		Dr Ashish		10.45-11.45
	Module 2: Treatment Planning and Case Selection				
4	Patient assessment and evaluation for implant treatment	Lecture, Interactive Discussion with Case Studies	Dr Ashish		1.00--1.45
5	Radiographic evaluation and diagnostic imaging techniques		Dr Bipin		1.45-2.30
6	Understanding of prosthetic options and treatment sequencing		Dr Sanket	2.30-3.30	

	Module 3: Surgical Techniques in Implant Dentistry				
7	Principles of aseptic technique and surgical site preparation	Lecture, Interactive Discussion with Case Studies	Dr Sanket	11-10-2022	9.15-10.00
8	Surgical implant placement protocols		Dr Kamal		10.00-11.00
9	Management of complications and surgical emergencies		Dr Paulami		11.00-12.00
	Module 4: Prosthodontic Procedures				
10	Impression techniques for implant restorations	Lecture, Interactive Discussion with Case Studies	Dr Bipin		1.00-1.45
11	Selection of implant components and abutment design		D Ashish		1.45-2.30
12	Fabrication and cementation of implant-supported crowns and bridges		Dr Malya	2.30-3.30	
	Module 5: Hands-on Clinical Training				
13	Live surgical demonstrations and supervised implant placement	Live Demonstration	Dr Kamal Dr Paulami	12-10-2022	9.15-11.30
14	Practical exercises on impression-taking and prosthetic fabrication		Dr Bipin Dr Ashish		1.00-3.30
15	Case discussions and treatment planning sessions		Dr Malya Dr Sanket

9. Use Of Intraoral Camera for Patient Education and Motivation

D Y PATIL GROUP

D Y PATIL DENTAL SCHOOL

Affiliated to the Maharashtra University of Health Sciences, Nashik
Recognized by Dental Council of India

Ref No: DYPDS/2587

Date: 06/09/2022

Subject: Value-added course –“Use of Intraoral Camera for Patient Education and Motivation”

Dear faculty & students,

We are pleased to announce the commencement of a value-added course titled “Use of Intraoral Camera for Patient Education and Motivation” at DY Patil Dental School. This course is designed to enhance knowledge and skills and competencies in the field of Use of Intraoral Camera.

Please find below the details of the course:

Course Title: Use of Intraoral Camera for Patient Education and Motivation

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 15th September to 17th September 2022

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

DYPDS, Lohegaon

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

USE OF INTRAORAL CAMERA FOR PATIENT EDUCATION AND MOTIVATION

Introduction:

Technological advancements in the field of dentistry have reformed the concept of photography as a powerful medium of expression and communication. It also offers a spectrum of perception, interpretation, and execution. One of the widespread clinical applications of computerization in dentistry today is the intraoral camera (IOC). It helps in the revelation of the hidden and overlooked defects in teeth and other parts of the cavity. Dental world constitutes of microstructures that have to be recorded in a detailed manner to perform patient education, documentation of records and treatment, illustration of lectures, publication and web connectivity of complicated cases.

IOC has a sensor located in the handpiece, which can be a charge-coupled device or a complementary metal-oxide-semiconductor sensor. These sensors receive light which is converted to an electronic signal that is processed by IOC imaging software to produce an image on the computer monitor. Better quality images are obtained when the sensor is placed closer to the lens. The LED lighting provides a continuous source of light to eliminate the need for a flash. Images captured by most of the IOC are stored in the in-built memory or can be stored in the computer. In-built proprietary software's help in archiving patient photographs and videos.

Objectives:

- To orient interns about Intraoral camera, its functioning, and indications
- To demonstrate its use for patients, patients' education and motivation for dental treatment
- Assigning patients to all interns and making them use the camera individually for multiple patients

Learning Outcome:

- **Understanding of Intraoral Camera Technology:** Knowledge of camera types, features, and their role in dental and medical imaging.
- **Practical Skills in Camera Operation:** Proficiency in handling and positioning intraoral cameras for optimal image capture.
- **Image Quality and Interpretation:** Ability to assess and interpret high-resolution intraoral images for diagnostic purposes.
- **Clinical Applications:** Identification of conditions visible through intraoral imaging, including dental caries, periodontal disease, and oral lesions.
- **Integration into Patient Care:** Utilization of intraoral images in treatment planning, patient education, and documentation.
- **Enhanced Communication:** Improved ability to communicate findings with patients and interdisciplinary healthcare teams using visual aids.

- **Workflow Efficiency:** Strategies for integrating intraoral cameras into clinical workflows to streamline examinations and documentation.

Course Content:

- **Introduction to Intraoral Cameras**
 - Types, features, and benefits in dental and medical imaging.
- **Camera Operation and Image Capture**
 - Hands-on practice with camera handling and positioning.
 - Techniques for obtaining clear and diagnostic intraoral images.
- **Image Quality and Interpretation**
 - Evaluation of image resolution, clarity, and diagnostic value.
- **Clinical Applications**
 - Use of intraoral images in diagnosing dental caries, periodontal disease, and oral lesions.
- **Integration into Patient Care**
 - Role of intraoral cameras in treatment planning, patient education, and documentation.
- **Communication and Collaboration**
 - Effective communication of findings with patients and healthcare teams using visual aids.
- **Workflow Optimization**
 - Strategies for integrating intraoral cameras into clinical workflows to improve efficiency.
- **Maintenance and Quality Assurance**
 - Maintenance protocols and quality control measures to ensure camera reliability.

Schedule:

The course will be conducted over 3 days on 15th September to 17th September 2022 at D.Y. Patil Dental School.

**USE OF INTRAORAL CAMERA FOR PATIENT EDUCATION AND
MOTIVATION**

SR NO.	TOPIC	METHOD	FACILITATOR	DATE	TIME
1.	Lecture: Technical aspects intraoral camera Disinfection of parts	Lectures and group discussions	Dr. Anagha Shete	15/09/22	9:00 am - 12:00 pm 1:00 pm - 4:00pm
2.	Demonstration- patient position, sensor position, use of sleeves, communication with the patients	Lectures and group discussions Demonstrations	Dr. Tejas Kulkarni	16/09/22	9:00 am - 12:00 pm 1:00 pm - 4:00pm
3.	Interns to perform technique for patients (per intern 10 patients minimum)	Demonstrations	Dr. Ashwini Nerkar	17/09/22	9:00 am - 12:00 pm 1:00 pm - 4:00pm

Circular:

Date: 29/08/2022

Subject: Value-added course - "**ECONOMICS OF FOOD**"

Dear faculty & Students,

- We are pleased to announce the commencement of a value-added course titled "**ECONOMICS OF FOOD**" at DY Patil Dental School.
- This course explores about the process of planning for food production with special reference to kitchen gardening.
- It also gives insights about various supplementary feeding programmes organized by the Government for the vulnerable groups - children and women have been emphasized.
- This course will help participants to understand the concept of adulteration and its precaution with special reference to consumer education.

Please find below the details of the course:

Course Title: **ECONOMICS OF FOOD**

Duration: 2 days

Venue: DY Patil Dental

Schedule: 5 & 6 - 9- 2022

Attendance: Attendance for all sessions is interest based.

We look forward to your active participation in this valuable learning opportunity.

Dr Anand Shigli

Professor & Head Dept of Pedodontics

D Y PATIL DENTAL SCHOOL

Dr. D Y Patil Knowledge City, Charholi Bk, Via Lohegaon, Pune – 412105

DEPARTMENT OF PEDODONTICS

ECONOMICS OF FOOD

Objective:

This course explored the tools and technologies that helps to understand the economics of food i.e. how do we spend our money on food. Through this program one will understand the concept of kitchen gardening. One will understand various supplementary feeding programmes organized by the Government for the vulnerable groups – children and women.

Learning outcomes

- Learn about the process of planning for food production with special reference to kitchen gardening.
- Government's effort in developing the Agriculture sector, the Poultry, Pisciculture and Dairy sector are highlighted.
- Various supplementary feeding programmes organized by the Government for the vulnerable groups –children and women- have been emphasized.
- The concept of adulteration and its precaution with special reference to consumer education.

Schedule:

The course will be conducted over 2 days from 11/9/2023 to 12/9/2023 at the department of Pedodontics. The course consists of interactive lectures, Q&A sessions & group discussion with case scenarios.

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Feedback (Pre & Post):

Pre-course feedback will be collected to assess participants' expectations and learning needs. Post-course feedback will be collected to evaluate participants' satisfaction with the course content, delivery, and outcomes.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule:

Course content:

1st Day	30 min Pre Assessment 7.5 hrs discussion Unit-1 How do we spend our food money Unit-2 How do we plan for growing our food Unit-3 Public distribution system Unit-4 Government agriculture policies and programmes Unit-5 Government's poultry and pisciculture programmes
2nd Day	7.5 hrs discussion Unit-6 Government's dairy development programmes Unit-7 Supplementary feeding programmes Unit-8 Protection of food supplies Unit-9 Food adulteration and precautions Unit-9 Food adulteration and precautions Unit-10 Consumer education 30 min Post Assessment

DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS

Subject: Value-added course - "**Future Directions in Orthodontics**"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled "**Future Directions in Orthodontics**" at DY Patil Dental School. This course is designed to enhance your clinical photography skills and competencies in the field of General Dentistry and Orthodontics.

Please find below the details of the course:

Course Title: **Future Directions in Orthodontics**

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 13th July 2022 to 15th July 2022

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

Dean

CC: To all Dental Department

VALUE-ADDED COURSE

TITLE: FUTURE DIRECTIONS IN ORTHODONTICS

Course Description:

The Value-added course on Future Directions in Orthodontics is tailored for dental professionals seeking insights into emerging trends, technologies, and advancements in the field of orthodontics. This course will delve into innovative techniques, digital orthodontics, interdisciplinary collaboration, and other cutting-edge topics shaping the future of orthodontic practice. Through interactive sessions, case studies, and expert discussions, participants will gain valuable knowledge and perspectives to stay ahead in the rapidly evolving field of orthodontics.

Course Objectives:

1. To explore emerging trends and advancements in orthodontics.
2. To understand the role of digital technologies in orthodontic diagnosis and treatment planning.
3. To discuss interdisciplinary approaches and collaborative strategies in orthodontic practice.
4. To gain insights into the future directions of orthodontics and potential opportunities for professional growth and development.

Learning Output:

Explore trends like digital planning, 3D printing, and AI in orthodontics. Analyze material science advancements' impact on appliance design. Evaluate collaborative approaches for complex cases. Discuss personalized treatment concepts and patient-centered care models. Examine teleorthodontics' implications. Investigate orthodontics in public health. Explore ethics in adopting new technologies. Appraise evidence for innovative treatment. Reflect on learning experiences in orthodontics.

Course Content:

Introduction to Future Directions in Orthodontics

- Overview of Emerging Trends in Orthodontics
- Digital Orthodontics: 3D Imaging and Treatment Simulation
- Artificial Intelligence and Machine Learning in Orthodontics
- Virtual Reality Applications in Orthodontic Education and Treatment Planning

Advanced Orthodontic Technologies

- 3D Printing in Orthodontics: Applications and Limitations

-CAD/CAM Technology in Orthodontic Appliance Fabrication

-Intraoral Scanning and Chairside Digital Workflow

-Robotic-assisted Orthodontic Treatment: Current Status and Future Prospects

Practice Management and Ethical Considerations

-Teleorthodontics: Opportunities and Challenges

-Practice Marketing and Patient Education in the Digital Age

-Ethical Considerations in Adopting New Technologies and Treatment Modalities

-Regulatory Landscape and Compliance Issues in Future Orthodontic Practice

Future Directions and Career Opportunities

-Trends Shaping the Future of Orthodontic Practice

-Innovations in Orthodontic Research and Clinical Trials

-Entrepreneurship and Innovation in Orthodontics

- Panel Discussion: Career Paths and Opportunities in Future Orthodontics

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Course Schedule:**Day 1:**

Date	Time	Topic	Facilitator
13/07/22	9:00AM - 10:30AM	Introduction to Future Directions in Orthodontics -Overview of Emerging Trends in Orthodontics -Digital Orthodontics: 3D Imaging and Treatment Simulation	Dr Jayshree Manikandan
	10.30AM - 12:00AM	Introduction to Future Directions in Orthodontics -Artificial Intelligence and Machine Learning in Orthodontics -Virtual Reality Applications in Orthodontic Education and Treatment Planning	Dr Suyog S
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Advanced Orthodontic Technologies -3D Printing in Orthodontics: Applications and Limitations -CAD/CAM Technology in Orthodontic Appliance Fabrication	Dr Jayshree Manikandan
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Advanced Orthodontic Technologies -Intraoral Scanning and Chairside Digital Workflow -Robotic-assisted Orthodontic Treatment: Current Status and Future Prospects	Dr Suyog S

Day 2:

Date	Time	Topic	Facilitator
		Practice Management and Ethical Considerations	
14/07/22	9:00AM - 10:30AM	Tele orthodontics: Opportunities and Challenges	Dr Arun M
	10.30AM - 12:00AM	Practice Marketing and Patient Education in the Digital Age	Dr Shailesh D
	12:00PM -12:30 PM	Lunch Break	

	12:30 PM -2:00 PM	Ethical Considerations in Adopting New Technologies and Treatment Modalities	Dr Arun M
	2:00 PM - 2:15 PM	Tea break	
	2:15 PM - 3:45 PM	Regulatory Landscape and Compliance Issues in Future Orthodontic Practice	Dr Shailesh D

Day 3:

Date	Time	Topic	Facilitator
		Future Directions and Career Opportunities	
15/07/22	9:00AM - 10:30AM	Trends Shaping the Future of Orthodontic Practice	Dr Varsha M
	10.30AM - 12:00AM	Innovations in Orthodontic Research and Clinical Trials	Dr Sandeep J
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Entrepreneurship and Innovation in Orthodontics	Dr Varsha M
	2:00 PM - 2:15 PM	Tea break	
	2:15 PM - 3:45 PM	Panel Discussion: Career Paths and Opportunities in Future Orthodontics	Dr Sandeep J

Subject: "Advances in Periodontal Surgery -VALUE-ADDED COURSE
ELETROCAUTERY"

Dear faculty & Interns,

We are pleased to announce the commencement of a value-added course titled "Advances in Periodontal Surgery - ELECTROCAUTERY" at DY Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of periodontology

Please find below the details of the course:

Course Title: Advances in Periodontal Surgery - ELECTROCAUTERY

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 20th April 2022 to 22nd April 2022

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

DEPARTMENT OF PERIODONTOLOGY

Advances in Periodontal Surgery -VALUE ADDED COURSE

ELECTROCAUTERY

ELECTROCAUTERY:

It uses high frequency electrical energy in the radio-transmission frequency band applied directly to tissue to induce histological effect.

Indications of electrocautery include soft tissue surgeries like gingivectomy, gingival depigmentation, frenectomies, blood co-agulation, pericoronitis.

Significance in dentistry:

Technology is constantly advancing with new research to provide the clinician with better therapy rendered to patients. Electrocautery have become an integral part of periodontal therapy. Clinician considering incorporating these modes of treatment modalities should be familiar with what is known, parameters to be used and receive adequate training to master these modes of treatment modalities.

Objectives:

- To orient interns to Electrocautery.

Duration: 15 Hrs.

Eligibility: Interns.

Selection method: Compulsory for all interns.

Course content:

1st Day	Brief introduction to: Peizosurgery Loupes. (Lecture)	Brief introduction to (Lecture) Microscope
2nd Day	3hrs Theory discussion (Electrocautery)	2hrs laser demo and Practice of (Electrocautery).
3rd Day	3hrs Theory discussion (Electrocautery)	2hrs demo and Practice of (Electrocautery).

Resource Literature:

Sr No.	Name of Staff	Topic
1.	Dr. Girish Byakod	Electrocautery (Lecture and Demo.)
2.	Dr. Parag Hadge	Piezosurgery
3.	Dr. Rakesh Mutha	Loupes
4.	Dr. Sachin Bhagat	Microscope

Subject: Value-added course - "DIGITAL DENTISTRY"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled "DIGITAL DENTISTRY" at DY Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of restorative dentistry and prosthodontics.

Please find below the details of the course:

Course Title: DIGITAL DENTISTRY

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 11/10/2021 to 13/10/2021

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

DIGITAL DENTISTRY

Introduction:

The "Digital Dentistry" course is designed to provide students with comprehensive training in utilising recent advances and technology in day-to-day practice for more precision and accuracy.

Objective:

The primary objective of this course is to make the students understand use technology and recent advances in routine dental practice to achieve patient - operator convenience as well as accuracy and precision in clinic - laboratory workflow.

Learning Outcome:

Upon completion of the course, participants will be able to:

- understand the need and convenience of digital workflow which is future of dentistry.
- Learn the principles, software, tools and techniques of digital workflow.
- Application of intra-oral scanner, 3D printing and lab communication for patient – operator convenience and provide immediacy in prosthodontics.

Course Content:

1. Fundamentals and principles of digital dentistry in prosthodontics.
2. Immediacy in FPD, Implantology, RPD.
3. Inventory needed for Clinic and lab communication.
3. Clinical Applications and Case Studies.
4. Workshops for intra-oral scanning, CAD-CAM and 3D printing

Schedule:

The course will be conducted over 3 days from 11th October 2021 to 13th October 2021 at the department of Prosthodontics & Implantology. The course consists of interactive lectures, case presentation & group discussion with case scenarios, live demonstration.

Sr No	Topic	Method	Facilitator	Date	Time
1	Fundamentals and principles of digital dentistry in prosthodontics 1: Introduction to intra oral scanners. 2: literature review on accuracy and precision as compared to conventional techniques.	Lectures & Group Discussion with Case Scenarios	Dr Kamal Dr Paulami Dr Bipin	11/10/21	9-12
2	Immediacy in FPD, RPD, Implantology 3: Fabrication of crown/bridge in single day. 4: Guided implant placement with immediate loading protocol 6: immediacy in RPDs	Live demonstration	Dr Ashish Dr Jitendra Dr Vivek	11/10/21	1-4
3	Inventory needed for clinic and laboratory communication 7: Indications and Contraindications for digital workflow 8: Inventory needed along with intra oral scanners, CAD-CAM technology in clinic and lab. 9: Introduction to 3D printers and materials	Lectures & Group Discussion with Case Scenarios	Dr Kamal Dr Paulami Dr Bipin Dr Ashish	12/10/21	9-12 & 1-4
4	Clinical applications and Hands-on Workshops 11: Demonstration of intra oral scanning & CAD-CAM. 12: demonstration of 3D printing of models. 13: Practice Session – Intra oral scanning and 3D printing of models. 14: Case-Based Discussions and Feedback	Group Discussion	Dr Kamal Dr Paulami Dr Bipin Dr Ashish	13/10/21	9-12 & 1-4

Basics of Patient Communication and Relationship Building for BDS Interns

Subject: Value Added Course - "Basics of Patient Communication and Relationship Building for BDS Interns"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled "Basics of Patient Communication and Relationship Building for BDS Interns" at DY Patil Dental School. This course is designed to teach students about establishing effective communication and relationships with patients.

Please find below the details of the course:

Course Title: Basics of Patient Communication and Relationship Building for BDS Interns

Duration: 4 days

Schedule: 12th October 2021- 15th October 2021

Attendance: Attendance for all sessions is mandatory.

Venue: DY Patil Dental School

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli
Dean

Basics of Patient Communication and Relationship Building for BDS Interns

Introduction:

This value-added course aims to equip dental students with effective patient communication and relationship building which would be essential in dental practice management.

By the end of the course, students will be prepared to effectively communicate with patients and build a long-term relationship with patients.

Objectives

1. Intern should be able to effectively communicate with patients
2. Intern should be able to handle patient inquiries and complaints
3. Intern should be able to build long-term patient relationships

Learning outcome:

Upon completion of the course, participants will be able to –

- Understand the importance of Patient Communication in dentistry
- Understand the importance of Relationship Building in dentistry
- Understand importance of communication for successful practice

Course content:

- Importance of Patient Communication in dentistry
- Importance of Relationship Building in dentistry
- Importance of communication for successful practice

Attendance:

Attendance will be monitored, and students are required to meet the minimum attendance criteria to be eligible for certification. Attendance for all sessions is mandatory.

Certification:

After Successful completion of the Value-Added Course the student will be acknowledged with a certification.

Schedule: Basics of Patient Communication and Relationship Building for BDS Interns

Date – 18/08/2021

Circular

This is to inform all the HODs and faculty that we are introducing a new two-day value-added course 'Insights of Suturing' for Final B.D.S. students. This course will be conducted by Dept. of OMFS. The upcoming course shall be conducted on 27th- 28th Sept, 2021. HODs and faculty of all the departments are requested to relieve students posted in the respective department for these 2 days.

The course details are as follows:

Date – 27-28th Sept, 2021 (Monday-Tuesday)

Time – 9:00 am – 5:00 pm

Venue – Lecture Hall 1 (3rd Floor)

Course Co-Ordinator – Dr. Pratik Hande, OMFS (Mob No. 8055320040)

Eligibility – Final B.D.S. students

Course fees – Free of cost

Please note that interns are instructed to carry their own clean Mcintosh sheet.

Dr. Anand Shigli
Dean, DYPDS

Suturing Techniques – Value-added course (2021-22)

Brochure

Introduction:

As experts in the art and science of dentistry, we understand how crucial suturing is to achieve the best possible results for patients. Suturing is a delicate discipline that requires dexterity, precision, and knowledge of anatomical structures. It is not just a technical skill.

Our goal in this extensive course is to give our dental students a strong foundation in suturing methods that are necessary for their clinical practice. This course provides an organized curriculum tailored to your needs, regardless of your level of experience, from beginner to expert wishing to improve your skills.

Participants in this program learn about the fundamentals of wound closure and acquire a variety of suturing techniques that are appropriate for a range of clinical situations. Under the direction of knowledgeable faculty members, learners obtain practical experience with anything from basic interrupted sutures to more intricate continuous designs.

This course stresses the significance of wound healing, patient comfort, and minimizing postoperative complications in addition to its technical features. Participants will gain knowledge of understanding tissue reactions, choosing suitable suture materials, and developing strategies for achieving optimal aesthetic outcomes.

Objectives of course –

1. Provide students with a thorough comprehension and expertise in fundamental suturing procedures, including mattress, simple interrupted, and continuous sutures.
2. Give students the chance to study and practice subcuticular sutures, vertical and horizontal mattress sutures, and other advanced suturing methods.
3. Stress the significance of attaining the best possible cosmetic results when closing a wound, such as minimizing scarring, aligning the borders of the wound, and maintaining the architecture of the surrounding tissue.
4. To guarantee effective wound closure and lower the risk of postoperative problems, acquire skills in appropriate surgical site preparation, tissue management, and haemostasis.

Duration: 16 Hrs divided in a 2 days module

Started since: September 2021

Intake: 85 trainees at a time

Eligibility:

4th BDS students

Selection method:

Preference will be given to Interns. However, Final BDS students can also attend if seats are available

Program Co-ordinator:

Dr. Vikram Karande, Professor and HOD, Dept. of OMFS

Staff Members:

Dr. Pratik Hande, Associate Professor, Dept. of OMFS

Dr. Kapil Kshirsagar, Associate Professor, Dept. of OMFS

Dr. Vaishali Pagare, Lecturer, Dept. of OMFS

Reference Books:

- Oral and Maxillofacial Surgery by Daniel Laskin
- Ethicon Wound Closure Manual

Course Schedule-

Day 1

Sr. No.	Content	Duration	Staff
1.	Power point Presentation: An Overview of Suturing Methods	8:00am to 10:00am (Morning Session)	Dr. Vikram Karande
2.	Power point Presentation: The Biomechanics of Tissue and Healing	10:00 am to 12:00 pm (Morning Session)	Dr. Pratik Hande
3.	Demonstration and Discussion: Basic Armamentarium and Properties of Suture Materials	1:00 pm to 3:00 pm (Afternoon session)	Dr. Vikram Karande
4.	Discussion: Selection of Suture Materials	3:00 pm to 5:00 pm (Afternoon session)	Dr. Pratik Hande

Day 2

Sr. No.	Content	Duration	Staff
1.	Demonstration of Basic Suturing Techniques: Interrupted, Continuous, Locking and Figure of 8	8:00am to 10:00am (Morning Session)	Dr. Vaishali Pagare
2.	Hands on training of Basic Suturing Techniques for students on Models	10:00 am to 12:00 pm (Morning Session)	Dr. Kapil Kshirsagar
3.	Demonstration of Advanced Suturing Techniques: Vertical and Horizontal Mattress, Subcuticular, Burried Sutures, etc	1:00 pm to 3:00 pm (Afternoon session)	Dr. Vaishali Pagare
4.	Hands on training of Advanced Suturing Techniques for students on Models	3:00 pm to 5:00 pm (Afternoon session)	Dr. Kapil Kshirsagar

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

Course title: Tobacco cessation awareness programme

Introduction:

The chief commercial crop of tobacco is *Nicotina tabacum*, though more than 70 species of tobacco are known, the more potent variant *N. rustica* is also used around the world. Tobacco contains the highly addictive stimulant alkaloid 'nicotine' apart from other alkaloids and chemicals. Dried tobacco leaves are mainly used for smoking in cigarettes, cigars, as well as pipes and shishas (Hookah). They are also consumed as snuff dipping, chewing tobacco and using it as dentifrices. Tobacco use is a cause or risk factor for many diseases; especially those affecting heart, liver, lungs and oral cavity. The treatment of these diseases and cancer is huge financial burden on patient's family. In 2008, the World Health Organization named tobacco use as the world's single greatest preventable cause of death. Its use is one of the leading causes of preventable morbidity and mortality in the world. Tobacco dependence is an addiction that is hard to quit and requires repeated intervention and multiple attempts to quit. Oral cancer is the 4th most common cancer in Indian males and 5th most common in Indian females. Dentist get opportunity to see the patients and create awareness among patients at the earliest. Inclusion of education on tobacco cessation into clinical setup provides the opportunities to the doctor to remind the tobacco users about the ill effects of tobacco and motivating them to quit. Identifying and assessing tobacco user increases clinician intervention and thus prevention. Tobacco cessation is the process of discontinuing tobacco smoking. Nicotine withdrawal often makes the process of quitting difficult.

Objectives:

The primary objective of this course is to equip participants with the knowledge and skills necessary to understand basic concepts of types of tobacco, Use of tobacco in different forms, Effects of tobacco and common oral lesions cause by tobacco use and methods of bring about tobacco awareness

Learning outcomes:

a. Knowledge

At the end of course the student is expected to know:

1. Basic concepts of types of tobacco
2. Use of tobacco in different forms
3. Effects of tobacco and common oral lesions cause by tobacco use
4. Methods of bring about tobacco awareness.

Course Content

Introduction and Impact of Tobacco Use

- Health implications and prevalence statistics.
- Role of counseling in oral health and radiology.

Behavioral and Psychological Aspects

- Addiction mechanisms and motivational interviewing techniques.

Clinical Assessment and Oral Health Effects

- Tobacco use history assessment and readiness to quit.
- Oral and systemic health consequences.

Counseling Strategies and Pharmacotherapy

- Evidence-based approaches and personalized cessation plans.
- Overview of pharmacological aids and referral resources.

Hands-On Workshop: Practical Counseling Skills

- Role-playing exercises for counseling scenarios.
- Developing cessation plans and setting goals.

Patient Education and Follow-Up

- Educating patients on risks and benefits of cessation.
- Monitoring progress and providing ongoing support.

Integration into Practice

- Workflow integration and collaborative care strategies.
- Enhancing patient outcomes through comprehensive care approaches

Schedule

The course will be conducted over 3days on 15th September 2021 to 17th september 2021 at Dept. of oral medicine and radiology, DY Patil Dental School, Pune.

Tobacco cessation awareness programme

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

Current Concepts In Cosmetic Dentistry For General Practitioner

Introduction:

To provide participants with latest techniques, materials, treatment planning for aesthetics. It will familiarize participants with digital tools and methodologies for smile design. This will emphasize the importance of minimally invasive approaches in cosmetic dentistry like porcelain veneers, crowns.

Objective:

To educate dental professionals on incorporating cosmetic dentistry in routine procedures for precision and accuracy in treatment. It aims to enhance their skills in performing treatment and minimizing procedural errors.

Learning Outcome:

Upon completion of the course, participants will be able to:

- Enhancing Practice Reputation: Practices that offer modern cosmetic dentistry services gain a reputation for being up-to-date and innovative. This can attract more patients who specifically seek out providers offering advanced cosmetic treatments.
- Improving Patient Outcomes: Advancements in cosmetic dentistry techniques and materials have led to more predictable and long-lasting results.
- Boosting Patient Confidence: Aesthetic dental treatments not only improve the appearance of patients' smiles but also enhance their self-esteem and overall quality of life.

Course Content:

1. Introduction to Cosmetic Dentistry
2. Scope of cosmetic dentistry
3. Advances in cosmetic dentistry
4. Techniques in Cosmetic dentistry

Schedule:

The course will be conducted over 3 days from 10/02/2021 to 12/02/2021 at the department of Conservative Dentistry and Endodontics. The course consists of interactive lectures, case presentation & group discussion with case scenarios, live demonstration & practice.

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule: Current Concepts In Cosmetic Dentistry For General Practitioner

Sr No	Topic	Method	Facilitator	Date	Time
1	Introduction to Cosmetic Dentistry 1: Introduction to Tooth Anatomy and Morphology 2: Principles of Tooth Reduction and Preservation 3: Dental Bonding	Lectures & Group Discussion with Case Scenarios	Dr Nandita Bansal	10/02/2021	9-12
2	Scope of cosmetic dentistry 4: Tooth preparation for Veneers and Laminates 5: Tooth Preparation for Composite 6: CAD/CAM uses	Live demonstration	Dr Kiran Keswani	10/02/2021	12.30-4.30
3	Advances in cosmetic dentistry 7: Indications and Contraindications for Different Types of Restorations 8: Treatment Planning Considerations 9: Clinical Decision-Making and Problem-Solving in Cosmetic dentistry 10: Management of Complications and Failures	Lectures & Group Discussion with Case Scenarios	Dr Vinod Kambli	11/02/2021	9-12 & 12.30-3.30
4	Practice session 11: Practice Session - Anterior tooth Composite 12: Practice Session - Full Veneers 13: Practice Session - Partial Veneers and Laminates 14: Case-Based Discussions and Feedback	Hands On & Group Discussion	Dr Nandita Bansal	12/02/2021	9-12 & 12.30-4

Subject: "SUTURING TECHNIQUES IN PERIODONTICS" value added course

Dear faculty & Interns,

We are pleased to announce the commencement of a value-added course titled "Suturing Techniques In Periodontics" at DY Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of periodontology

Please find below the details of the course:

Course Title: "SUTURING TECHNIQUES IN PERIODONTICS"

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 21st December 2021 to 23rd December2021

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

SUTURING TECHNIQUES IN PERIODONTICS

Introduction:

Suture is a stitch or series of stitch made to secure apposition of the edges of surgical or traumatic wound. Sutures are natural or synthetic textile biomaterials widely used in wound closure, to ligate blood vessels and to draw tissues together. Suture materials are available in both monofilament and multifilament configuration.

Goal:

1. Wound edge apposition
2. Provide adequate tension
3. Maintain hemostasis
4. Allow healing by primary closure

Armamentarium:

1. Needle holder
2. Suture needle
3. Suture material
4. Suture cutting scissor

Principles of suturing:

1. The needle should be grasped at approximately $\frac{1}{3}$ of the distance from the eye and $\frac{2}{3}$ from point
2. The needle should be pierced the tissue perpendicular to its surface
3. The needle should be equidistance (2-3mm) from the incision line.
4. Depth of penetration should be equal on both side of incision line
5. The needle should always pass from movable tissue to fixed tissue thinner tissue to thicker tissue and deeper tissue to superficial tissue.
6. Tissue never be closed under tension
7. Each suture must be placed 3-4mm apart from incision line

Suturing techniques:

1. Simple interrupted suture
2. Continuous suture
3. Figure of 8
4. Horizontal mattress
5. Vertical mattress

Objectives:

- To orient interns to suturing technique.

Duration: 15 Hrs.**Eligibility:** Interns.**Selection method:** Compulsory for all interns.**Course content:**

1st Day	Brief introduction to: Sutures and Suturing Techniques. (Lecture)	Brief introduction to Suturing materials (Lecture)
2nd Day	3hrs Theory discussion on suturing materials.	3hrs Demo and Practice of suturing technique.
3rd Day	3hrs Theory discussion on suturing technique.	3hrs demo and Practice of different suturing techniques.

Resource Literature:

<u>Sr No.</u>	<u>Name of Staff</u>	<u>Topic</u>
1.	Dr. Girish Byakod	Introduction on suture material
2.	Dr. Parag Hadge	Suture materials (Lecture)
3.	Dr. Rakesh Mutha	Suturing Techniques
4.	Dr. Sachin Bhagat	Suturing techniques (Demo)

DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS

Subject: Value-added course - "Role of TMJ in Orthodontics"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled "Role of TMJ in Orthodontics" at DY Patil Dental School. This course is designed to enhance your clinical photography skills and competencies in the field of General Dentistry and Orthodontics.

Please find below the details of the course:

Course Title: **Role of TMJ in Orthodontics**

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 13th July 2021 to 15th July 2021

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

Dean

D Y Patil Dental School, Pune

CC: To all Dental Department

VALUE ADDED COURSE

TITLE: ROLE OF TMJ IN ORTHODONTICS

Course Overview:

This course provides a comprehensive understanding of the temporomandibular joint (TMJ) and its significance in orthodontic diagnosis, treatment planning, and management of malocclusions. Participants will gain insights into the anatomy, function, disorders, and treatment modalities related to the TMJ, equipping them with the knowledge and skills to effectively incorporate TMJ considerations into their orthodontic practice.

Course Objectives:

1. To familiarize participants with the anatomy and biomechanics of the temporomandibular joint.
2. To explore the relationship between TMJ disorders and malocclusions.
3. To discuss the impact of orthodontic treatment on TMJ health and function.
4. To understand the role of imaging techniques in assessing TMJ conditions.
5. To learn about conservative and surgical management approaches for TMJ disorders.
6. To integrate TMJ considerations into orthodontic diagnosis and treatment planning.
7. To develop skills in recognizing and managing TMJ-related complications during orthodontic treatment.

Learning Outcome:

Participants will gain a deeper understanding of the role of the temporomandibular joint in orthodontics, enabling them to make informed clinical decisions, optimize treatment outcomes, and effectively manage TMJ-related issues in their practice.

Course Content:

1. Introduction to Temporomandibular Joint (TMJ) Anatomy and Function:
 - Overview of TMJ anatomy, including structures and articulating surfaces.
 - Biomechanics of TMJ function, including mandibular movements and muscle actions.
2. TMJ Disorders and Malocclusions:
 - Classification of TMJ disorders (e.g., disc displacement, arthritis) and their clinical manifestations.
 - Relationship between TMJ disorders and various types of malocclusions.
3. Impact of Orthodontic Treatment on TMJ Health:

- Review of studies examining the effects of orthodontic interventions on TMJ function and stability.

- Discussion on evidence-based approaches to minimize TMJ-related risks during orthodontic treatment.

4. Imaging Techniques for TMJ Assessment:

- Introduction to imaging modalities used for TMJ evaluation (e.g., MRI, CBCT).

- Interpretation of radiographic findings related to TMJ anatomy and pathology.

5. Management of TMJ Disorders:

- Conservative treatment options for TMJ disorders (e.g., occlusal splints, physiotherapy).

- Surgical interventions for refractory cases (e.g., arthroscopic surgery, joint replacement).

6. Integrating TMJ Considerations into Orthodontic Practice:

- Incorporating TMJ assessment into routine orthodontic examinations.

- Tailoring orthodontic treatment plans based on TMJ status and patient-specific factors.

7. Case Studies and Clinical Scenarios:

- Analysis of clinical cases illustrating the interaction between TMJ health and orthodontic treatment outcomes.

- Discussion on strategies for managing TMJ-related complications encountered during orthodontic practice.

Course Schedule:**Day 1:**

Date	Time	Topic	Facilitator
13/07/21	9:00AM - 10:30AM	Introduction to Temporomandibular Joint (TMJ) Anatomy and Function: - Overview of TMJ anatomy, including structures and articulating surfaces. - Biomechanics of TMJ function, including mandibular movements and muscle actions	Dr Wasim
	10:30AM - 12:00AM	TMJ Disorders and Malocclusions:- - -Classification of TMJ disorders (e.g., disc displacement, arthritis) and their clinical manifestations. - Relationship between TMJ disorders and various types of malocclusions	
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Impact of Orthodontic Treatment on TMJ Health: - Review of studies examining the effects of orthodontic interventions on TMJ function and stability. - Discussion on evidence-based approaches to minimize TMJ-related risks during	Dr Suyog S
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Imaging Techniques for TMJ Assessment: -Introduction to imaging modalities used for TMJ evaluation (e.g., MRI, CBCT). - Interpretation of radiographic findings related to TMJ anatomy and pathology.	

Day 2:

Date	Time	Topic	Facilitator
14/07/21	9:00AM - 10:30AM	Management of TMJ Disorders: - Conservative treatment options for TMJ disorders (e.g., occlusal splints, physiotherapy).	Dr Shailesh D
	10:30AM - 12:00AM	Management of TMJ Disorders: - Surgical interventions for refractory cases (e.g., arthroscopic surgery, joint replacement).	
	12:00PM - 12:30 PM	Lunch Break	
	12:30 PM - 2:00 PM	Integrating TMJ Considerations into Orthodontic Practice:- - Incorporating TMJ assessment into routine orthodontic examinations.	Dr Arun M
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Integrating TMJ Considerations into Orthodontic Practice:- - Tailoring orthodontic treatment plans based on TMJ status and patient-specific factors	

Day 3:

Date	Time	Topic	Facilitator
15/07/21	9:30AM -- 12:00AM	Case Studies and Clinical Scenarios: - Analysis of clinical cases illustrating the interaction between TMJ health and orthodontic treatment outcomes	Dr Varsha M
	12:00PM - 12:30 PM	Lunch Break	

	12:30 PM -3:00 PM	Case Studies and Clinical Scenarios: - Discussion on strategies for managing TMJ-related complications encountered during orthodontic practice.	Dr Sandeep J

20. Professionalism and Legal Aspects in Dentistry

DY PATIL GROUP

DY PATIL DENTAL SCHOOL

Affiliated to the Maharashtra University of Health Sciences, Nashik
Recognized by Dental Council of India

Ref. No: DYPDS/1543

Date: 01/04/2021

Subject: Value added course on “Professionalism and Legal Aspects in Dentistry”

Dear faculty and students,

We are pleased to announce the commencement of a value-added course titled “Professionalism and Legal Aspects in Dentistry” at DY PATIL DENTAL SCHOOL. The course aims to supplement the existing curriculum by offering additional knowledge and practical skills that will further enrich the learning journey of our students. I request the HODs to allow the students to attend the value-added course on the above-mentioned day from 9.30 am – 4.00 pm at lecture hall no 4.

Please find the details of the course:

Course Title: Professionalism and Legal Aspects in Dentistry

Duration: 3 days

Venue: DY PATIL DENTAL SCHOOL

Schedule: 7/04/2021 to 9/04/2021

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

Professionalism In Dentistry

Eligibility criteria: IV BDS and INTERNS.

Introduction:

The term “relationship” means nothing more than indicating the relative position of two objects in time and space or in a classification system. What is life? When J. Krishna Murthy, a philosopher was asked by a person, he replied “Life is full of relationships”. From birth till death, we all live a life of relationships. We establish, sustain, break, renew, rejuvenate and retreat our relationships with the world. Establishing and sustaining good and healthy relationship helps for better interaction. Human relationship implies that the participants have some understanding of each other’s behavior and act in ways that take this into account. Participants have expectations about each other, which influence the particular form of actions that will be taken.

Relationship between a doctor and his or her patient is one that is oriented toward the doctor helping the patient to deal effectively with a health problem. Patients cooperate with doctors and doctors attempt to return patients to as normal level of functioning as possible. Doctors usually take some type of action to satisfy the patients’ expectations. Doctors should be attentive not only to patients’ complaints but also to other factors that brought them to the doctor. Profession refers to having special knowledge or skill in a particular field. Bernard Shaw rightly said, “**Skill is not enough, trust is essential**”. The layman might imagine that the primary concern of professionals would be professional competence.

However, physical appearance, behavior and communication skills of professionals might influence doctor-patient relationship, especially for those patients who have never met the dentist previously. Patients’ attitude towards the dental care becomes important because patients’ satisfaction with their dentists is a primary determinant to seek dental care, people who are dissatisfied tend to avoid care and jeopardize their dental health. Dentist - Patient

relationship is the heart of successful dentistry. So, what does the public think of dentistry and what do dental patients think of dentists is vital for complete understanding of the image of dentistry.

This course examines the issue of professionalism in relation to dental colleagues, and how it impacts upon the range of medico-legal challenges they might face. It provides an overview of professionalism in a healthcare context and explores some of the characteristics that different parties would associate with it.

The mismatch between these different perspectives and the relative importance that each party attaches to different aspects of professionalism, can often sit at the heart of complaints and litigation.

The course questions whether or not traditional professional values and behaviours are still relevant in a modern healthcare environment that is increasingly digital, consumerist and competitive – or conversely in such a fast- changing world, whether the need for a modern professionalism is greater than ever.

Objectives of the Course:

At the end of this course participants will be able to (8 credits hours):

- (i) Issues of professionalism in dentistry
- (ii) Characteristics of professionalism
- (iii) Different dimensions of professionalism.
- (iv) Patients and public perception.
- (v) nature of professionalism and its relevance to the career

Expected learning outcome

- a. Effective communication with patients, the dental team and others across dentistry, including when obtaining consent, dealing with complaints, and raising concerns when patients are at risk.
- b. Effective management of self and effective management of others or effective work with others in the dental team, in the interests of patients; providing constructive leadership where appropriate
- c. Maintenance of skills, behaviours and attitudes which

maintain patient confidence in you and the dental profession and put patients' interests first

Contents

- a. Ethics and morals in dental practice
- b. Communication with patients and care takers
- c. Paternalism in dentistry
- d. Consent
- e. Perception of patients towards dental diseases and dentistry
- f. Practice philosophy
- g. Record maintenance
- h. Attire and scheduling
- i. Duties towards the dental colleagues
- j. Duties towards public and community
- k. Role and responsibilities of dental auxiliaries
- l. Dental advertisement
- m. Emergency dental care

DEPARTMENT OF PEDODONTICS AND PREVENTIVE DENTISTRY

Circular: DYPDS/1612

Date: 28/11/2020

Subject: Value-added course - " **DIGITAL LEARNING** "

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled " **DIGITAL LEARNING** " at DY Patil Dental School. This course explored the tools and technologies that support the features and applications of VR, AR and MR. Learners in this course discovered the basic concepts of creating VR, AR and MR experiences and the ethics involved in developing these kinds of applications.

Please find below the details of the course:

Course Title: **DIGITAL LEARNING**

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 2nd Dec 2020 to 4th Dec 2020

Attendance: Attendance for all sessions is interest-based for the students of 1st and 2nd BDS.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli
Dean, Professor & Head
Dept of Pedodontics

DEPARTMENT OF PEDODONTICS
DIGITAL LEARNING

Objective: This course explored the tools and technologies that support the features and applications of VR, AR and MR. Learners on this course discovered the basic concepts of creating VR, AR and MR experiences as well as the ethics involved in developing these kinds of applications.

PART 1- AUGMENTED REALITY, VIRTUAL REALITY AND MIXED REALITY

Learning outcomes

- Describe the basic concepts of VR, AR, and MR
- Describe how XR is being used in industries beyond entertainment
- Describe the potential benefits of using XR applications in the real world
- Explore the tools and technologies used in XR
- Identify the ethical considerations of developing XR applications
- Identify the hallmarks of successful VR, AR and MR experiences

Syllabus

- The fundamentals of XR (VR, AR and MR)
- The ethics surrounding the creation of XR applications
- Careers/pathways in and skills in XR
- The technologies and tools in creating XR projects

PART 2- ETHICAL DENTAL LITERATURE WRITING

Learning outcomes

- Describe the origins and advent of AI
- Explain the relationship between AI and Automation
- Reflect on the application of AI to your own context

- Identify key shifts in the workplace influenced by AI
- Assess the impact shifts in the workplace may have on roles and responsibilities
- Identify how the relationship has changed between AI and humans
- Identify future skills required to work and interact with AI
- Produce an action plan to adapt your skills for the future

Syllabus

PART 3- INTRODUCTION TO ARTIFICIAL INTELLIGENCE

- What is Artificial Intelligence and where did it come from?
- AI in Action - Dissertations
- What does this mean for the dental industry?

Artificial Intelligence in the Dental Industry

- Impact of AI on Individuals
- Tools used in writing

Adapting your skills to work with Artificial Intelligence

- How has the relationship changed the dental literature?
- Imagining the Future
- Assessment.

Schedule:

The course will be conducted over 3 days from 2nd Dec 2020 to 4th Dec 2020 at the Department of Pedodontics. The course consists of interactive lectures, Q&A sessions & group discussions with case scenarios.

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Feedback (Pre & Post):

Pre-course feedback will be collected to assess participants' expectations and learning needs. Post-course feedback will be collected to evaluate participants' satisfaction with the

course content, delivery, and outcomes.

Certificate:

Participants who complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule:

Course content:

PROGRAM CONTENT	Augmented Reality (AR) and Virtual Reality (VR) are making significant inroads into the field of dentistry, revolutionizing education, diagnostics, treatment planning, and patient care. A value-added course focusing on AR and VR applications in dentistry can provide dental professionals and students with cutting-edge skills and knowledge. A value-added course on AR and VR in dentistry can significantly enhance the skill set of dental professionals and students, preparing them for the future of dental practice. The integration of AR/VR technologies in dentistry promises improved patient care, more efficient training, and innovative treatment planning, making it a valuable addition to any dental education program.

Subject: Value-added course - "Esthetic Prosthodontics: Mastering Aesthetic Restorations"

Dear faculty & Students,

We are pleased to announce the commencement of a value-added course titled " Esthetic Prosthodontics: Mastering Aesthetic Restorations" at DY Patil Dental School. This course is designed to enhance the clinical skills and competencies in the field of restorative dentistry and prosthodontics.

Please find below the details of the course:

Course Title: Esthetic Prosthodontics: Mastering Aesthetic Restorations

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 12th October 2020 to 14th October 2020

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

Dean

DEPARTMENT OF PROSTHODONTICS & IMPLANTOLOGY

Course Title: Esthetic Prosthodontics: Mastering Esthetic Restorations

Introduction:

The "Esthetic Prosthodontics: Mastering Esthetic Restorations" course is designed to provide participants with advanced training in aesthetic principles and techniques for prosthodontic restorations. This course will focus on enhancing participants' skills in creating natural-looking and harmonious smiles using modern materials and techniques in aesthetic dentistry.

Objective:

The primary objective of this course is to equip participants with the knowledge and skills necessary to plan, design, and execute aesthetic restorations in prosthodontics. By the end of the course, participants will be proficient in achieving optimal esthetic outcomes while maintaining functional integrity and long-term stability of restorations.

Learning Outcome:

Upon completion of the course, participants will be able to:

- Understand the principles of smile design and facial aesthetics in prosthodontics.
- Perform comprehensive smile analyses and treatment planning for aesthetic restorations.
- Select appropriate materials and techniques for achieving natural-looking restorations.
- Master the art of tooth preparation, shade selection, and layering techniques for aesthetic restorations.
- Apply digital smile design principles and technologies to enhance smile esthetics and patient satisfaction.

Course Content:

1. Principles of Aesthetic Prosthodontics: Concepts and Applications
2. Smile Analysis and Treatment Planning for Aesthetic Restorations
3. Materials and Techniques for Aesthetic Restorations (e.g., ceramics, composite resins)

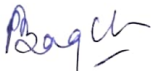

4. Tooth Preparation and Layering Techniques for Aesthetic Restorations
5. Shade Selection and Color Matching in Aesthetic Dentistry
6. Digital Smile Design: Applications and Workflow Integration
7. Case Studies and Clinical Applications of Aesthetic Prosthodontics
8. Patient Communication and Managing Expectations in Aesthetic Dentistry

Schedule:

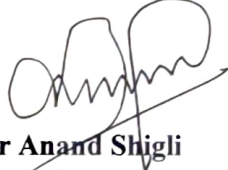

The course will be conducted over 3 days on 12th October to 14th October 2020 at DY Patil Dental School.

Esthetic Prosthodontics: Mastering Aesthetic Restorations

Sr No	Topic	Method	Facilitator	Date	Time
1	Principles of Aesthetic Prosthodontics: Concepts and Applications	Lectures, Demonstration & Group	Dr Ashish		
2	Smile Analysis and Treatment Planning for Aesthetic Restorations	Discussion with Case Scenarios	Dr Jitendra	12/10/2020	9-12 & 1-4
3	Materials and Techniques for Aesthetic Restorations (e.g., ceramics, composite resins)		Dr Vivek		
4	Tooth Preparation and Layering Techniques for Aesthetic Restorations	Lecture, Live demonstration	Dr Kamal		
5	Shade Selection and Color Matching in Aesthetic Dentistry		Dr Paulami	13/10/2020	9-12 & 1-4
6	Digital Smile Design: Applications and Workflow Integration		Dr Bipin		
7	Case Studies and Clinical Applications of Aesthetic Prosthodontics	Case Presentation, Role Play & Group	Dr Kamal Dr Paulami		9-12 &
8	Patient Communication and Managing Expectations in Aesthetic Dentistry	Discussion	Dr Bipin Dr Ashish	14/10/2020	1-4

Subject: Value Added Course - " **Magnification In Endodontics** "

Dear faculty & Students,

We are pleased to announce the commencement of a workshop titled " **Magnification In Endodontics**" at DY Patil Dental School. This course is designed to enhance your clinical skills.

Please find below the details of the course:

Course Title: Tooth Preparation: **Magnification In Endodontics**

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 15th February 2020 to 17th February 2020

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

Magnification In Endodontics

Introduction:

The " **Magnification In Endodontics**" provides the comprehensive knowledge and practical skills for use of magnification in the field of endodontics. Tailored for dental students, this program enriches expertise in managing routine endodontic procedures by integrating Magnification in day-to-day practice. Covering crucial concepts, techniques, and hands-on training, it optimizes the execution of root canal treatments.

Objective:

To educate dental professionals on incorporating magnification in routine endodontic procedures for precision and accuracy in treatment. It aims to enhance their skills in performing treatment and minimizing procedural errors.

Learning Outcome:

1. Comprehend the fundamentals of magnification in endodontics, including its benefits and limitations, for improved clinical practice.
2. Identify various magnification tools employed in endodontic procedures, such as dental loupes and surgical microscopes, and adapt them for optimal usage.
3. Employ proper ergonomic techniques when utilizing magnification devices to ensure operator comfort and reduce the risk of musculoskeletal strain.
4. Apply magnification methods proficiently to enhance visualization during diagnostic assessments, treatment planning, and procedural execution in endodontics.
5. Evaluate the impact of magnification on diagnostic accuracy and treatment outcomes, fostering a commitment to ongoing professional development and collaboration within the dental team.

Course Content:

Sr. no.	Content
1.	Introduction to Magnification in Endodontics
2.	Types of Magnification Devices
3.	Clinical Application of Magnification in Endodontics
4.	Ergonomics and Professional Development

Schedule:

The course will be conducted over 3 days from 15/02/2020 to 17/02/2020 at the Conservative Dentistry & Endodontics. The course consists of interactive lectures, case presentation & group discussion with case scenarios, live demonstration & hands on.

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule: Magnification In Endodontics

Sr No	Topic	Method	Facilitator	Date
1	I. Introduction to Magnification in Endodontics A. Understanding the Importance of Magnification B. Historical Development of Magnification Devices C. Overview of Different Types of Magnification Tools	Lectures & Group Discussion with Case Scenarios	Dr. Nandita Bansal	15/02/2020
2	II. Types of Magnification Devices A. Dental Loupes 1. Types and Features 2. Selection Criteria 3. Adjustment and Calibration Techniques B. Surgical Microscopes 1. Components and Functionality 2. Advantages and Limitations 3. Setup and Maintenance C. Digital Magnification Systems 1. Principles of Operation 2. Integration with Clinical Workflow 3. Comparison with Traditional Magnification Devices	Live demonstration & Hands On	Dr. Kiran Keswani	15/02/2020
3	III. Clinical Application of Magnification in Endodontics A. Diagnostic Phase 1. Radiographic Interpretation 2. Visualization of Access Cavity 3. Identification of Canal Anatomy B. Treatment Planning 1. Assessment of Treatment Complexity 2. Predicting Procedural Challenges 3. Patient Communication and Informed Consent C. Procedural Phase 1. Access Cavity Preparation 2. Canal Location and Negotiation 3. Instrumentation and Obturation Techniques D. Post-treatment Evaluation	Lectures & Group Discussion with Case Scenarios	Dr. Vinod Kambli	16/02/2020

	1. Final Restoration Assessment 2. Evaluation of Treatment Outcomes 3. Long-term Follow-up Protocols			
4	IV. Ergonomics and Professional Development A. Ergonomic Considerations 1. Operator Comfort and Posture 2. Prevention of Musculoskeletal Disorders 3. Equipment Ergonomics and Adjustment B. Continuing Education and Training 1. Ongoing Skill Development 2. Incorporation of New Technologies 3. Participation in Professional Workshops and Conferences C. Collaboration and Interdisciplinary Care 1. Team-Based Approach to Patient Care 2. Effective Communication with Dental Assistants and Specialists 3. Integration of Magnification Techniques into Comprehensive Treatment Plans	Hands On & Group Discussion	Dr. Nandita Bansal	17/02/2020

24. Antibiotics in Dentistry – Use and Overuse

DY PATIL GROUP

DY PATIL DENTAL SCHOOL

Affiliated to the Maharashtra University of Health Sciences, Nashik
Recognized by Dental Council of India

Ref. No: DYPDS / 1132

Date: 02/03/2020

Subject: Workshop on "Antibiotics in Dentistry: Use & Overuse"

Dear faculty and students,

We are pleased to announce the commencement of a Workshop on "Antibiotics in Dentistry: Use & Overuse" at DY PATIL DENTAL SCHOOL. The course aims to supplement the existing curriculum by offering additional knowledge and practical skills that will further enrich the learning journey of our students.

Please find the details of the course:

Title: Antibiotics in Dentistry: Use & Overuse

Duration: 3 day

Venue: DY PATIL DENTAL SCHOOL

Schedule: 05/03/2020 to 07/03/2020

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean, DYPDS

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

Antibiotics in Dentistry – Use and Overuse

Eligibility criteria: IV BDS and INTERNS

Introduction

The oral cavity is a complicated biological ecosystem replete with organisms that live in a biofilm. For most pulpal and periodontal diseases, the change from health to disease state is associated with a change in the balance of the ecosystem, usually from resident facultative anaerobes to obligate anaerobes.

Even though only a few microorganisms cause odontogenic infections, many nonpathogenic bacterial species contribute by maintaining an ecosystem favorable for pathogenic species for survival and growth. Microorganisms in a biofilm are consistently 1000-1500 times more resistant to standard antibiotic dosage. Most dental pain is caused by an infection-induced inflammatory process in a closed compartment, such as the pulp and apical periodontal region, or in a sensitive and highly innervated soft tissue, such as the periosteum space, gingiva, and periodontium.

The removal of infectious foci is the overarching principle of all infectious process management. Mechanical removal of infectious foci is used to control dental infections. When the soft tissue spaces are involved, it can be accomplished by removing the infected pulp, scaling and root planning and drainage of the pus. For maximum benefit, a combination of one or more of these techniques is usually used. When combined with the appropriate use of anti-inflammatory agents, this can result in immediate pain and infection relief. Antibiotics do not help with pain relief because they have no effect on the inflammatory process that causes pain. In most cases, antibiotics are not required if appropriate measures to remove infectious foci are taken.

The use of antibiotics in conjunction with dental procedures is frequently a source of conundrum among dental practitioners. Excessive use of antibiotics are major factors in the emergence of antibiotic resistance. Antibiotic overuse and misuse among dentists is substantial.

Antibiotic resistance now has been universally identified as public health priority and responsible prescribing practice is required to combat resistance. This continuing education course is designed to provide scientifically based guidance to clinicians regarding the use of antibiotics in dentistry.

Objectives of the Course:

At the end of this course participants will be able to (30 credits hours):

- (i) Fundamentals in Antibiotics.
- (ii) Explore the risks of both infections and antibiotics to patients.
- (iii) Choice of rationale medication.
- (iv) antibiotic resistance.
- (v) Describe the global problem of antibiotic resistance (ABR)

Expected learning outcome:

- (i) Review the most common antibiotics used in dentistry.
- (ii) Understand the different mode of actions by which these medications work.
- (iii) Understand the classification of antibiotics on the basis of range of activity.
- (iv) Understand the concept of microbial resistance as it applies to these medications.
- (v) Understand the principles of antibiotic usage and its administration in dentistry.
- (vi) Understand pharmacology of commonly used antibiotics.
- (vii) Learn the commonly used antibiotics and recommended dosages in dental practice.
- (viii) Learn the indicated clinical conditions for antimicrobial therapy in dentistry.
- (ix) Understand the responsible use of antibiotics in endodontic treatment.
- (x) Understand the narrow-spectrum and broad-spectrum antimicrobial agents encountered in dentistry and common indications for use.
- (xi) Learn the therapeutic uses of antibiotics in dentistry
- (xii) Understand the recent updates in antibiotic prophylaxis for cardiac, orthopedic and immunocompromised patients. Recommendations for antibiotic prophylaxis prior to certain dental procedures.

- (xiii) Learn the microbiology and antimicrobial regimens in selected odontogenic and non-odontogenic orofacial infections.
- (xiv) Learn clinical tips for responsible antibiotic prescribing in dentistry
- (xv) Understand antibiotic resistance and development of adverse effects.

Contents:

- (i) Introduction
- (ii) Principles of antibiotic therapy
- (iii) Rationale to choose antimicrobials
- (iv) Dosage and course
- (v) Antibiotic resistance
- (vi) Emerging and reemerging infectious diseases
- (vii) Antibiotics double edge sword
- (viii) Broad and narrow spectrum antibiotics
- (ix) Prescription pattern by dentist
- (x) Reasons for prescription of antibiotics
- (xi) Antibiotics and environment
- (xii) Adverse effects
- (xiii) Compliance of patients
- (xiv) Financial implications of antibiotic prescription

Schedule:

Sr No	Topic	Method	Facilitator	Date	Time
1.	Introduction to Antibiotics in Dentistry	Lecture	Dr Karibasappa	05/03/2020	9:00 AM - 10:30 AM
2.	Antibiotic Prophylaxis in Dentistry	Lecture	Dr Karibasappa	05/03/2020	10:30 AM - 12:30 PM
3.	Antibiotics in Endodontic Treatment	Lecture	Dr Karibasappa	05/03/2020	1:30 PM - 3:00 PM
4.	Antibiotics in Periodontal Therapy	Group Discussions	Dr Karibasappa	06/03/2020	9:00 AM - 11:00 AM
5.	Antibiotics in Oral Surgery and Implantology	Lecture	Dr Karibasappa	06/03/2020	11:00 AM - 12:30 PM
6.	Antibiotic Stewardship in Dentistry	Lecture	Dr Karibasappa	06/03/2020	12:30 PM - 2:00 PM
7.	Antibiotic Prescribing and Patient Education	Lecture	Dr Karibasappa	07/03/2020	9:00 AM - 11:00 AM
8.	Antibiotics in Special Populations	Lecture	Dr Karibasappa	07/03/2020	11:00 AM - 12:30 PM
9.	Recent Advances and Future Directions	Lecture	Dr Karibasappa	07/03/2020	12:30 PM - 2:00 PM
10.	Case Studies and Group Discussions	Group Discussions	Dr Karibasappa	07/03/2020	3:00 PM - 4:00 PM

Circular

Subject: "INTRA-ORAL CAMERA" value added course

Dear Faculty & Students,

We are pleased to announce the commencement of a value-added course titled "Intra-Oral Camera" at D Y Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of periodontology

Please find below the details of the course:

Course Title: "INTRA-ORAL CAMERA"

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 20th January 2020 to 22nd January 2020

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

DEPARTMENT OF PERIODONTOLOGY

Value Added Course

Intra-Oral Camera – Value Added Course

Introduction

Intra-Oral Camera is an effective tool used by dentists to communicate and educate their patients; they are essentially tiny digital cameras that enable dentists to capture images of difficult-to-reach areas in the mouth. They can easily go inside the mouth and capture digital images inside it. They are powerful tools to effectively find out teeth problems hidden even in the most troublesome areas of the mouth. The camera looks like a writing pen that, when moved around inside the mouth, allows the practitioner to see detailed, enlarged images of teeth surfaces, gum conditions, and other minute detail about tissues, cavities, etc. that cannot be seen by the naked eye. An intraoral camera does not cause any pain or discomfort to the patient and has no side effects. It captures clear video and images of the corroded or tarnished fillings, hairline fractures, bleeding gums, plaque, and several other critical teeth problems in real-time, while the patient is comfortably seated in the dental chair.

Advantages:

1. **Early Detection of Oral Health Problems**
2. Improved Patient-Doctor Relation
3. Improves Accuracy of the Advised Treatment
4. For Future Case Documentation
5. Enhances Doctor's Credibility
6. Better for Insurance Claims

Disadvantages:

1. Cost of Purchasing the Instrument.
2. Learning curve of the system
3. Camera can be large for patients with small mouth.
4. Some systems still require slightly messy powder.

Objectives:

- To orient students to Intra-Oral Camera.

Duration: 15 Hrs.

Eligibility: Final BDS Students

Selection method: Compulsory for all final BDS students.

Course content:

1st Day	Brief introduction to: Intra-Oral Camera (Lecture)	Brief introduction to (Lecture) Intra-Oral Camera
2nd Day	3hrs Theory discussion (Intra-Oral Camera)	2 hrs demo and (Practice demonstration of Intra-Oral Camera).
3rd Day	3hrs Theory discussion (Intra-Oral Camera)	2hrs demo and Practice of (Intra-Oral Camera).

Basics of Microsoft Power Point for BDS Students

Subject: Advance workshop - "Basics of Microsoft Power Point for BDS Students"

Dear faculty & Students,

We are pleased to announce the commencement of an advance workshop titled "Basics of Microsoft PowerPoint for BDS Students" at DY Patil Dental School. This course is designed to enhance your technical skills. The course on Basics of Microsoft PowerPoint for Students typically covers essential skills such as document creation, formatting, and presentation design

Please find below the details of the course:

Course Title: Tooth Preparation: Basics of Microsoft Power Point for BDS Students

Duration: 5 days

Schedule: 10th October 2019 to 16th October 2019

Attendance: Attendance for all sessions is mandatory.

Venue: DY Patil Dental School

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

Dean

Basics of Microsoft Power Point for BDS Students

Introduction:

The advance workshop on Basics of Microsoft PowerPoint for Students typically covers essential skills such as document creation, formatting, and presentation design. Students will learn to effectively use these tools for professional communication and academic presentations.

Objective:

The course aims to equip BDS Students on Microsoft PowerPoint with practical skills that can be applied in their academic and professional endeavours, enhancing their ability to communicate and present information effectively.

Learning outcome:

Upon completion of the course, participants will be able to –

- Create and design effective slides using slide layouts and themes on Microsoft PowerPoint.
- Insert multimedia elements and prepare engaging presentations

Course content:

Microsoft PowerPoint:

- Creating and designing effective slides
- Using slide layouts and themes
- Inserting multimedia elements
- Tips for engaging presentations

Attendance:

Attendance will be monitored, and students are required to meet the minimum attendance criteria to be eligible for certification.

Certification:

After Successful completion of the Advance workshop the student will be acknowledged with a certification.

Schedule: Basics of Microsoft Power Point for BDS Students

Sr. no	Topic	Method	Facilitator	Date	Time
1.	Introduction to Microsoft PowerPoint for BDS students	Lectures and group discussions	Dr. Deepak Dr. Prasad Dr. Mrunal	10/10/2019	9-1
2.	Creating and designing effective slides	Demonstrations and lectures	Dr. Deepak Dr. Prasad Dr. Mrunal	11/10/2019	12-4
3.	Using slide layouts and themes	Demonstrations and lectures	Dr. Deepak Dr. Prasad Dr. Mrunal	12/10/2019	9-1
4.	Inserting multimedia elements	Demonstrations and lectures	Dr. Deepak Dr. Prasad Dr. Mrunal	15/10/2019	9-1
5.	Tips for engaging presentations	Demonstrations and lectures	Dr. Deepak Dr. Prasad Dr. Mrunal	16/10/2019	9-1

Date – 18/08/2019

Circular

This is to inform all the HODs and faculty that we are introducing a new two-day value-added course 'Road safety awareness' for Final B.D.S students. This course will be conducted by Dept. of OMFS. The upcoming course shall be conducted on 27th- 28th Sept, 2019. HODs and faculty of all the departments are requested to relieve final year students posted in the respective department for these 2 days.

The course details are as follows:

Date – 27-28th Sept, 2019

Time – 9:00 am – 5:00 pm

Venue – Lecture hall 1 (3rd Floor)

Course Co-Ordinator – Dr. Kapil Kshirsagar, OMFS (Mob No. 9823112682)

Eligibility – Final B.D.S. students

Course fees – Free of cost

Dr. Anand Shigli
Dean, DYPDS

Road safety awareness – Value-added course (2019-20)

Brochure

Available statistics about road safety in India indicates that more than a lakh people die in road accidents every year. Pedestrians, cyclists, and riders of motorized 2- and 3-wheelers and their passengers are collectively known as "vulnerable road users" and account for half of all road traffic deaths around the world. A higher proportion of vulnerable road users die in low-income countries than in high-income countries.

There is an increasing trend of unsafe driving that leads to vehicle accidents in which many people die, undergo serious injuries or lose their body parts permanently. Many of these accidents occur due to poor driving skills, non-adherence to road safety precautions, lack of awareness and violation of traffic rules.

Road safety teaches people how to conduct themselves while driving or crossing roads. Road safety measures, including the use of road barriers and highway barriers, are aimed at reducing the risks of people getting involved in accidents in the first place. Following these measures, the chances of accidents, injuries and damage to property are vastly reduced.

Aim:

This program is aimed at raising awareness about traffic rules and ultimately to reduce casualties due to road accidents.

Objectives of course –

1. Measure the magnitude and impact of road traffic injuries
2. Assess the key risk factors
3. Strengthen the evidence base for prevention
4. Implement promising interventions

Duration: 16 Hrs divided in a 2 days module

Started since: September 2019

Intake: Maximum 100 trainees at a time

Eligibility: 4th BDS students of ongoing batch

Programme Co-ordinator:

Dr. Kapil Kshirsagar, Associate Professor, Dept. of OMFS

Course Schedule –

Day 1

Sr. No.	Content	Duration	Staff
1.	Power Point Presentation on Anatomical Considerations of Maxillofacial Skeleton	8:00am to 10:00am (Morning Session)	Dr Pratik Hande
2.	Power Point Presentation on Common Patterns of Maxillofacial Fractures in Road Traffic Accidents	10:00 am to 12:00 pm (Morning Session)	Dr Kapil Kshirsagar
3.	Video demonstration of Short films showing Common Mistakes in Driving	1:00 pm to 3:00 pm (Afternoon session)	Dr Pratik Hande
4.	Discussion on Traffic Rules in India	3:00 pm to 5:00 pm (Afternoon session)	Dr Kapil Kshirsagar

Day 2:

Sr. No.	Content	Duration	Staff
1.	Power point presentation on Road Safety Awareness and Role of Bystanders	8:00am to 10:00am (Morning Session)	Dr Vikram Karande (Guest Speaker)
2.	Power point Presentation on ATLS	10:00 am to 12:00 pm (Morning Session)	Dr Vikram Karande (Guest Speaker)
3.	Brief Outline of Management of Maxillofacial Trauma Patients	1:00 pm to 3:00 pm (Afternoon session)	Dr Pratik Hande
4.	Legal Considerations in case of Road traffic Accidents	3:00 pm to 4:00 pm (Afternoon session)	Dr Kapil Kshirsagar
5.	Queries solving and Certificate Distribution	4:00 pm to 5:00 pm	Dr Pratik Hande

Subject: Lecture with Hands On--“Vital Staining Technique”

Dear faculty & students,

We are pleased to announce the commencement of a Lecture with hand's on titled “Vital Staining Technique” at DY Patil Dental School. This course is designed to enhance knowledge and skills and competencies in the field of Vital Staining Technique.

Please find below the details of the course:

Course Title: Vital Staining Technique

Duration: 4 days

Venue: DY Patil Dental School

Schedule: 25th September to 28th September 2019

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

DYPDS, Lohegaon

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

VITAL STAINING TECHNIQUES

Introduction:

A dye or stain can penetrate the living cells or tissues and not induce immediate degenerative changes. Vital stain means a stain that can be applied to living cells without killing them. Thus, these stains have been useful for both diagnostic and surgical techniques in a variety of medical specialties. As this technique is simple, easy to perform, and cost-effective, it can be useful in diagnosing any malignant changes occurring and preventing them on a community level. Thus, this vital staining can be used as an important tool in diagnosing the pathology.

Objectives:

To orient and demonstrate interns about vital staining technique, its functioning, and indications and to educate students on the principles, applications, and safe implementation of vital staining techniques to enhance diagnostic accuracy and improve patient care in oral medicine and radiology.

Learning Outcome:

Upon completion of the course, participants will be able to

- Understand the principles and mechanisms of vital staining agents used in oral medicine and radiology.
- Learn the indications and clinical applications of vital staining in diagnosing oral lesions, mucosal abnormalities, and potentially malignant disorders.
- Gain practical skills in performing vital staining procedures effectively and safely.
- Interpret and analyze staining patterns to differentiate between normal, dysplastic, and malignant tissues.
- Discuss the advantages, limitations, and clinical relevance of various staining methods.
- Apply vital staining techniques confidently in clinical practice to aid in early detection and treatment planning.
- Evaluate case studies to reinforce understanding of staining results and their diagnostic implications.
- Collaborate effectively with multidisciplinary teams to integrate staining techniques with other diagnostic modalities.
- Adhere to ethical standards, safety protocols, and regulatory guidelines in the use of staining agents in patient care.

Course content:

- Introduction to Vital Staining
- Indications and Clinical Applications
 - Diagnostic applications in oral lesions, mucosal abnormalities, and potentially malignant disorders.
 - Role in identifying microbial biofilms and assessing oral hygiene.
- Techniques and Methodologies
 - Detailed overview of different staining methods (e.g., toluidine blue, methylene blue, acetic acid).
 - Step-by-step procedures for conducting vital staining effectively.
- Interpretation and Analysis
 - Patterns and characteristics of stained tissues.
 - Differentiation between normal, dysplastic, and malignant lesions based on staining results.
- Advantages and Limitations
 - Benefits of vital staining in early detection and screening.
 - Potential challenges and limitations in interpretation.
- Hands-On Workshop
 - Preparation and safety protocols for handling staining agents.
 - Practical demonstration and supervised practice of vital staining techniques on models or simulated oral tissue.
- Case Studies and Discussion
 - Analysis of clinical case studies showcasing the diagnostic utility of vital staining.
 - Group discussion on interpreting staining results and formulating clinical decisions.
- Integration into Clinical Practice
 - Workflow integration of vital staining techniques in oral medicine and radiology.
 - Strategies for collaboration with other healthcare professionals to enhance patient care.

Schedule:

The course will be conducted over 3 days on 25th September to 28th September 2019 at D.Y. Patil Dental School.

Schedule:

The course will be conducted over 3 days on 25th September to 28th September 2019 at D.Y. Patil Dental School.

Subject: 3-day course on " Fundamentals of Complete Denture "

Dear Students,

We are pleased to announce the commencement of a 3-day comprehensive titled "Fundamentals of Complete Denture " for III BDS students at DY Patil Dental School. This course is designed to provide participants with advanced training in restorative dentistry and prosthodontics, focusing on refining skills in complex restorative procedures.

Course Title: Fundamentals of Complete Denture

Duration: 3 days

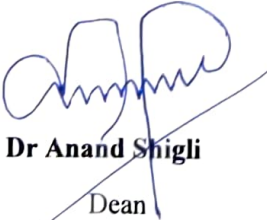

Venue: DY Patil Dental School

Schedule: 20th August 2019 to 22nd August 2019

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr Anand Shigli

DEPARTMENT OF PROSTHODONTICS & IMPLANTOLOGY

Fundamentals of Complete Denture

Introduction:

The "Fundamentals of Complete Denture" course is designed for III BDS students to provide foundational knowledge and essential skills in the fabrication and management of complete dentures. This course covers basic principles, clinical procedures, and practical techniques necessary for successful denture construction and patient care.

Objective:

- To understand the importance and indications of complete dentures.
- To learn the anatomical landmarks relevant to denture fabrication.
- To acquire skills in impression taking, jaw relation recording, and denture try-in.
- To gain proficiency in the use of dental materials and equipment for complete dentures.
- To develop the ability to handle post-insertion adjustments and patient education.

Expected Outcomes

- Students will be able to perform all necessary clinical steps in complete denture fabrication.
- Students will understand and apply the principles of complete denture design.
- Students will be proficient in taking accurate impressions and creating diagnostic and master casts.
- Students will be able to manage post-insertion complications and provide comprehensive patient care.
- Students will integrate theoretical knowledge with practical skills in their clinical practice.

Course Content:

1. Importance and Indications of Complete Dentures
2. Anatomy Relevant to Complete Denture Fabrication
3. Principles of Complete Denture Design
4. Impression Materials and Techniques
5. Preliminary Impressions and Diagnostic Casts
6. Techniques for Final Impressions
7. Fabrication of Custom Trays
8. Creating Master Casts
9. Recording Jaw Relations
10. Determining Vertical Dimension and Centric Relation
11. Wax Try-In Procedures
12. Esthetic and Phonetic Considerations
13. Occlusal Adjustments
14. Denture Insertion Techniques
15. Post-Insertion Adjustments and Patient Education

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule:

Day 1: Introduction and Fundamentals of Complete Denture

Time	Topic	Method	Facilitator
9:00-10:30	Importance and Indications of Complete Dentures	Lecture & Group Discussion	Dr. Kamal
10:30-12:00	Anatomy Relevant to Complete Denture Fabrication	Lecture & Group Discussion	Dr. Paulami
12:00-1:00	Principles of Complete Denture Design	Lecture & Group Discussion	Dr. Bipin
2:00-3:30	Impression Materials and Techniques	Lecture & Demonstration	Dr. Ashish
3:30-5:00	Preliminary Impressions and Diagnostic Casts	Lecture & Hands-On Practice	Dr. Jitendra

Day 2: Clinical Steps and Techniques for Denture Fabrication

Time	Topic	Method	Facilitator
9:00-10:30	Techniques for Final Impressions	Lecture & Hands-On Practice	Dr. Kamal
10:30-12:00	Fabrication of Custom Trays	Lecture & Hands-On Practice	Dr. Paulami
12:00-1:00	Creating Master Casts	Lecture & Hands-On Practice	Dr. Bipin
2:00-3:30	Recording Jaw Relations	Lecture & Hands-On Practice	Dr. Ashish
3:30-5:00	Determining Vertical Dimension and Centric Relation	Lecture & Hands-On Practice	Dr. Jitendra

Day 3: Denture Try-In, Insertion, and Follow-Up

Time	Topic	Method	Facilitator
9:00-10:30	Wax Try-In Procedures	Lecture & Hands-On Practice	Dr. Kamal
10:30-12:00	Esthetic and Phonetic Considerations	Lecture & Hands-On Practice	Dr. Paulami
12:00-1:00	Occlusal Adjustments	Lecture & Hands-On Practice	Dr. Bipin
2:00-3:30	Denture Insertion Techniques	Lecture & Hands-On Practice	Dr. Ashish
3:30-5:00	Post-Insertion Adjustments and Patient Education	Lecture & Hands-On Practice	Dr. Jitendra

Program Content	The Department of Prosthodontics recently conducted a comprehensive three-day course titled "Fundamentals of Complete Denture" for III BDS students. The course aimed to provide in-depth knowledge and essential skills in the fabrication and management of complete dentures, covering basic principles, clinical procedures, and practical techniques necessary for successful denture construction and patient care. The course saw enthusiastic participation from III BDS students who were eager to enhance their knowledge and practical skills. Each session included lectures, demonstrations, and hands-on practice, ensuring a comprehensive learning experience. The facilitators, including Dr. Kamal, Dr. Paulami, Dr. Bipin, Dr. Ashish, and Dr. Jitendra, provided valuable insights and guided the students through the various stages of complete denture fabrication.

Subject: Workshop - "**Modern Root Canal Treatment For Day-To-Day Clinical Practice**"

Dear faculty & Students,

We are pleased to announce the commencement of a workshop course titled " Modern root canal Treatment for day-to-day clinical practice " at DY Patil Dental School. This course is designed to enhance your clinical skills.

Please find below the details of the course:

Course Title: Tooth Preparation: "**Modern Root Canal Treatment For Day-To-Day Clinical Practice**"

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 14th February 2019 to 16th February 2019

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely

Dr. Anand Shigli

Dean

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

"Modern Root Canal Treatment For Day-To-Day Clinical Practice"

Introduction:

The "Modern Root Canal Treatment For Day-To-Day Clinical Practice". This course provides the comprehensive knowledge and practical skills in using the rotary instrumentation in root canal procedures. This programme is tailored for dental interns to enhance their expertise in root canal procedures by incorporating rotary instruments into their practice. The course covers essential concepts, techniques, and hands-on training to optimize root canal procedures.

Objective:

To educate dental professionals on using rotary instruments and techniques for efficient and effective cleaning, shaping and Obturation of root canals during endodontic procedure. It aims to enhance their skills in performing root canal treatment with precision and minimizing procedural errors.

Learning Outcome:

1. Identify the indications and contraindications for modern root canal treatment, distinguishing cases suitable for endodontic therapy from those requiring alternative interventions.
2. Demonstrate proficiency in the use of contemporary diagnostic tools, such as digital radiography and electronic apex locators, to accurately assess the root canal anatomy and determine treatment plans.
3. Apply current knowledge of anatomical variations and complexities in root canal systems to effectively navigate and negotiate canals, ensuring thorough cleaning and shaping to prevent reinfection.
4. Evaluate and select appropriate irrigation solutions and techniques, including ultrasonic and laser-assisted irrigation, to enhance disinfection and removal of organic debris within the root canal system.

5. Implement evidence-based strategies for obturation of root canals using biocompatible materials and techniques, such as thermoplastic gutta-percha and warm vertical compaction, to achieve predictable and durable seal of the canal space.

Course Content:

Sr. no.	Content
1.	Introduction to Modern Endodontics
2.	Diagnostic Considerations in Endodontics
3.	Clinical Techniques in Root Canal Therapy
4.	I. Ergonomics and Professional II. Obturation and Restoration

Schedule:

The course will be conducted over 3 days from 14/02/2019 to 16/02/2019 at the Conservative Dentistry & Endodontics. The course consists of interactive lectures, case presentation & group discussion with case scenarios, live demonstration & hands on.

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule: "Modern Root Canal Treatment For Day-To-Day Clinical Practice"

Sr No	Topic	Method	Facilitator	Date
1	I. Introduction to Modern Endodontics A. Historical overview of root canal therapy B. Evolution of techniques and materials in endodontics C. Current challenges and trends in endodontic practice	Lectures & Group Discussion with Case Scenarios	Dr. Nandita Bansal	14/02/2019
2	II. Diagnostic Considerations in Endodontics A. Clinical examination and patient history taking B. Radiographic interpretation and use of digital imaging C. Pulp vitality testing techniques D. Utilization of electronic apex locators for accurate length determination	Live demonstration & Hands On	Dr. Kiran Keswani	15/02/2019
3	III. Clinical Techniques in Root Canal Therapy A. Access cavity preparation: principles and modifications B. Cleaning and shaping of the root canal system 1. Instrumentation techniques (e.g., hand files, rotary instruments) 2. Irrigation protocols and solutions C. Strategies for managing complex anatomical variations 1. Treatment of curved canals 2. Management of calcified canals 3. Negotiation of isthmuses and fins D. Use of adjunctive technologies in endodontics 1. Ultrasonic and sonic activation of irrigation 2. Laser-assisted disinfection	Lectures & Group Discussion with Case Scenarios	Dr. Nandita Bansal. & Dr. Vinod Kambli	16/02/2019

4	IV. Ergonomics and Professional IV. Obturation and Restoration A. Selection and application of root canal obturation materials 1. Techniques for cold lateral compaction 2. Warm vertical compaction methods B. Assessment of quality and completeness of obturation C. Core build-up and post placement considerations D. Restoration options following root canal therapy: direct vs. indirect restorations	Hands On & Group Discussion	Dr. Nandita Bansal	17/02/2019

DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS
Clinical Digital Photography

Introduction: Photographs are an essential part of clinical documentation. Current 'best practice' is a full set of extra- and intraoral photographs, both at the start and completion of a course of orthodontic treatment and, ideally, some midtreatment photographs showing key-stages in treatment

Need of Photography:

- Documentation of records for medicolegal reasons
- To compare pretreatment and posttreatment results
- To document findings that may be unique and to share those findings with peers
- For obtaining data to make presentations and teaching students
- To use data in clinical practice for patient information and motivation
- Mandatory requirements of certification examinations
- What we learn today is because of the clinical photographs, we see in textbooks. These were available courtesy the efforts of those authors. The profession will be furthered, and our next generation will learn if each clinician as a torchbearer of the subject makes that the same effort.

Significance In Dentistry:

Clinical photographs allow the orthodontist to carefully study the existing patient's soft-tissue patterns during the treatment planning stage.

We can assess lip morphology and tonicity, the smile arc and smile esthetics from various angles.

We can also assess the degree of incisal show upon smiling. Thus, they allow us to study the patient in a so called "social" setting, and all that without the patient ever being present.

Such information greatly aids the orthodontist in formulating the best possible treatment plan for each patient, and for monitoring in subsequent follow-ups.

Objectives:

1. Mastery of Clinical Photography Techniques
2. Application in Patient Care
3. Ethical and Legal Considerations
4. Image Management and Integration

Learning Outcome:

1. Understand the principles of photography and their application in orthodontic documentation, diagnosis, and treatment planning.
2. Demonstrate proficiency in using digital cameras, lenses, and lighting equipment to capture high-quality intraoral and extraoral images for orthodontic purposes.
3. Identify optimal camera settings and techniques for capturing standardized clinical photographs, including occlusal views, intraoral close-ups, and extraoral facial profiles.
4. Utilize image editing software to enhance and analyze orthodontic photographs, including adjustments for color balance, contrast, and clarity.
5. Develop standardized protocols for patient positioning, framing, and image consistency to ensure reproducibility and accuracy in orthodontic photography.

Course Content :

1st Day	Introduction and Basics in Photography
2nd Day	Advanced Techniques and Clinical Application
3rd Day	Image Editing and Case Presentation

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Course Schedule:

Day 1: Introduction and Basics

Date	Time	Topic	Facilitator
13/07/19	9:00AM - 10:30AM	Importance of Digital Photography in Orthodontics - Role of photography in diagnosis and treatment planning - Ethical considerations	Dr Wasim
	10.30AM - 12:00AM	Basics of Photography-Artificial - Understanding camera types and settings - Lenses and their applications in orthodontics	Dr Suyog S
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Lighting and Composition - Different types of lighting - Tips for proper composition	Dr Wasim
	2:00 PM - 2:15 PM	Tea Break	
	2:15 PM - 3:45 PM	Hands-on Session 1: Camera Handling and Basic Shots - Practicing with different camera settings - Taking initial photographs	Dr Suyog S

Day 2:

Date	Time	Topic	Facilitator
		Advanced Techniques and Clinical Applications	
14/07/19	9:00AM - 10:30AM	Advanced Camera Settings - Manual mode - Advanced focus and exposure settings	Dr Arun M
	10.30AM - 12:00AM	Clinical Photography Protocols	Dr Shailesh D

		- Standardized views in orthodontics - Intraoral and extraoral photography techniques	
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Hands-on Session 2: Clinical Photography - Practicing standardized views - Working with mirrors and retractors	Dr Arun M
	2:00 PM - 2:15 PM	Tea break	
	2:15 PM - 3:45 PM	Image Management and Storage - Organizing and storing digital photographs - Software for image management	Dr Shailesh D

Day 3:

Date	Time	Topic	Facilitator
		Image Editing and Case Presentation	
15/07/22	9:00AM - 10:30AM	Basic Image Editing - Introduction to photo editing software - Basic editing techniques (cropping, color correction)	Dr Varsha M
	10.30AM - 12:00AM	Advanced Image Editing - Enhancing details for better clinical presentations - Creating before and after comparisons	Dr Sandeep J
	12:00PM -12:30 PM	Lunch Break	
	12:30 PM -2:00 PM	Case Presentation Preparation - Preparing a complete case presentation using digital photographs - Tips for effective presentation	Dr Varsha M
	2:00 PM - 2:15 PM	Tea break	

	2:15 PM - 3:45 PM	Final Hands-on Session and Feedback - Presenting prepared cases - Group discussion and feedback - Certificate distribution and closing remarks	Dr Sandeep J

32.Zirconia Crowns in Pediatric Dentistry

D Y PATIL DENTAL SCHOOL

Affiliated to the Maharashtra University of Health Sciences, Nashik
Recognized by Dental Council of India

Ref: DYPDS/ 787

Date: 2/3/2019

CIRCULAR

Workshop on the topic “Zirconia crowns in Pediatric Dentistry” will be conducted on 4th to 6th March 2019. All Interns are instructed to attend the workshop. Interested staff members can also attend the workshop. All the HOD's are informed to thus make required clinical arrangements for the same.

Please find the details below-

Venue: -Department of Pedodontics

Time – 9:30 am – 2:30 pm

Speaker – Dr Pritesh Gawali

Dr Anand Shigli
DEAN

Zirconia crowns in Pediatric Dentistry

Zirconia crowns have emerged as a popular choice for restoring primary and permanent teeth in pediatric patients due to their durability, esthetics, and biocompatibility. Through a combination of lectures, demonstrations, interactive sessions, and hands-on practice, this course will delve into the fundamentals of zirconia crowns, covering topics such as material properties, preparation techniques, fabrication methods, cementation procedures, and management of complications.

Day 1: 04/03/2019

Objective: Introduce Dental Interns to the fundamentals of zirconia crowns and their application in pediatric dentistry.

Learning Outcomes:

1. Understand the properties and advantages of zirconia crowns in pediatric dentistry.
2. Learn the step-by-step procedure for preparing and placing zirconia crowns in pediatric patients.
3. Gain hands-on experience in fabricating and fitting zirconia crowns on typodont models.

Schedule:

- **Session 1: Introduction to Zirconia Crowns (9:30-10:30am)**
 - Overview of zirconia material properties and its suitability for pediatric patients.
 - Discussion on advantages and limitations compared to other crown materials.
- **Session 2: Indications and Contraindications (10:30-11:30 am)**
 - Identify suitable cases for zirconia crowns in pediatric dentistry.
 - Understand contraindications and limitations for their use.
- **Session 3: Preparation Techniques (11:30 -12:30 pm)**
 - Detailed demonstration of tooth preparation for zirconia crowns.
 - Hands-on practice on typodont models.
- **Session 4: Crown Fabrication (12:30-1:30 pm)**
 - Explanation of fabrication process, including impression techniques and laboratory procedures.
 - Introduction to CAD/CAM technology in crown fabrication.

- **Session 5: Cementation and Follow-up (1:30 -2:30pm)**
 - Learn cementation techniques for zirconia crowns.
 - Discuss post-cementation care and follow-up protocols.

Day 2: 05/03/2019

Objective: Provide interns with advanced skills and techniques for optimizing zirconia crown placement in pediatric patients.

Learning Outcomes:

1. Master techniques for achieving optimal fit and esthetics of zirconia crowns.
2. Understand strategies for managing complications and troubleshooting during crown placement.
3. Enhance communication skills for effective patient and parent education regarding zirconia crown procedures.

Schedule:

- **Session 6: Esthetics and Occlusion (9:30 – 12:00 pm)**
 - Discuss strategies for achieving optimal esthetics with zirconia crowns in pediatric patients.
 - Understand principles of occlusion and how to ensure proper occlusal adjustment.
- **Session 7: Complications and Troubleshooting (12:00-2:30 pm)**
 - Identify common complications during zirconia crown placement and learn troubleshooting techniques.
 - Case-based discussions and problem-solving exercises.

Day 3: 06/03/2019

Objective: Provide interns with hands on practice on typhodont models and reviewing case studies highlighting successful zirconia crown placements in pediatric patients.

Learning Outcomes:

1. Master techniques for achieving effective communication strategies for discussing zirconia crown procedures with pediatric patients
2. Providing hands on practice to interns on typhodont models

Schedule:

- **Session 8: Communication and Patient Education (9:30-11:30 am)**
 - Effective communication strategies for discussing zirconia crown procedures with pediatric patients and their parents.
 - Role-playing scenarios and communication exercises.
- **Session 9: Hands-on Practice and Case Studies (11:30-1:30 pm)**
 - Rotate through stations for additional hands-on practice on tyodont models.
 - Review case studies highlighting successful zirconia crown placements in pediatric patients.
- **Session 10: Q&A and Wrap-up (1:30-2:30 pm)**
 - Address any remaining questions or concerns from interns.
 - Recap key learnings and provide resources for further study

DEPARTMENT OF PROSTHODONTICS & IMPLANTOLOGY

Basics of Tooth Preparation

Introduction:

The "Basics of Tooth Preparation" is designed to provide students with comprehensive training in advanced tooth preparation techniques, equipping them with the knowledge and practical skills necessary to excel in restorative dentistry and prosthodontics.

Objective:

The primary objective of this course is to familiarize students with the principles and techniques of tooth preparation for various restorative procedures, enhance their understanding of the biomechanical principles underlying tooth preparation, and foster critical thinking and decision-making skills in the context of restorative dentistry.

Learning Outcome:

Upon completion of the course, participants will be able to:

- Demonstrate proficiency in basics tooth preparation techniques.
- Understand the theoretical principles of tooth preparations.

Course Content:

1. Fundamentals of Tooth Preparation
2. Armamentarium and Materials
3. Introduction to Crown Preparations
4. Advanced Techniques in Tooth Preparation
5. Hands-on Workshops

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule: Basics of Tooth Preparation

Basics of Microsoft Word for BDS Students

Introduction:

The advance workshop on Basics of Microsoft Word for Students typically covers essential skills such as document creation, formatting, and presentation design. Students will learn to effectively use these tools for professional communication and academic presentations.

Objective:

The course aims to equip BDS Students on Microsoft word with practical skills that can be applied in their academic and professional endeavours, enhancing their ability to communicate and present information effectively.

Learning outcome:

Upon completion of the course, participants will be able to –

- Create and format documents using various styles and templates on Microsoft Word.
- Insert and format images and modify tables.

Course content:

Microsoft Word:

- Creating and formatting documents
- Styles and templates
- Inserting and formatting images
- Inserting and modifying table

Attendance:

Attendance will be monitored, and students are required to meet the minimum attendance criteria to be eligible for certification. Attendance for all sessions is mandatory.

Certification:

After Successful completion of the Advance workshop the student will be acknowledged with a certification.

Dean, DYPDS

IM and IV injection technique – Value-added course (2018-19)

Brochure

Injection Administration Training is crucial for healthcare professionals to maintain their competence in administering injectable medications and ensure that they are up to date with the current best practices and techniques. All practitioners involved in administering injectable medicines must have the necessary knowledge, skills, and attitude to prepare and administer prescribed medications safely. Unsafe injection practices can have significant consequences for patients, including nerve damage, abscesses, and pain, which can result in potential legal action. Therefore, it is essential for healthcare professionals to receive Injection Administration Training to ensure that they are providing optimal care to patients and avoiding adverse events.

By participating in Injection Administration Training, attendees will gain the necessary knowledge and skills to safely and effectively administer injectable medications, reducing the risk of harm to patients and promoting patient safety.

Aim: To train the students/interns to perform IM/ IV injection

Objectives of course –

1. Provide students with a thorough comprehension and expertise in fundamental intramuscular and intravenous injection techniques
2. Give students the chance to study and practice anatomical landmarks.
3. Stress the significance of knowing the importance of being able to administer im and iv injection

Duration: 16 Hrs divided in a 2 days module

Started since: September 2018

Intake: 9 trainees per group at a time per day. Total 18 trainees.

Eligibility: Interns

Selection method:

Interns of current batch

Programme Co-ordinator:

Dr. Pratik Hande, Associate Professor, Dept. of OMFS

Reference Books:

1. Clinical Surgery – Michael H.
2. Fundamental of Nursing Potter and Perry and Jeffrey Thomson

Course Schedule –

Day 1

Sr. No.	Content	Duration	Staff
1.	Power Point Presentation on anatomical landmarks for IV	8:00am to 10:00am (Morning Session)	Dr Pratik Hande
2.	Power Point Presentation on anatomical landmarks for IM	10:00 am to 12:00 pm (Morning Session)	Dr Kapil Kshirsagar
3.	Video demonstration of IV / IM	1:00 pm to 3:00 pm (Afternoon session)	Dr Pratik Hande
4.	Discussion on Commonly used drugs in dentistry and their administration	3:00 pm to 5:00 pm (Afternoon session)	Dr Kapil Kshirsagar

Day 2:

Sr. No.	Content	Duration	Staff
1.	Demonstration on the patient for IM	8:00am to 10:00am (Morning Session)	Dr Pratik Hande
2.	Demonstration on the patient for IV	10:00 am to 12:00 pm (Morning Session)	Dr Kapil Kshirsagar
3.	Students to perform on patient	1:00 pm to 3:00 pm (Afternoon session)	Dr Pratik Hande
4.	Queries solving and Certificate Distribution	3:00 pm to 5:00 pm (Afternoon session)	Dr Kapil Kshirsagar

Report of Program in September 2018

Name of The Course	IM and IV Injection Techniques
Category	Value Added Course
Date of Course	27-28 September, 2018
Contact Hours	16 hours
Co-Ordinator	Dr Pratik Hande
Participants	18
Program Content	Dept. of Oral and Maxillofacial Surgery conducted IM and IV Injection Techniques Course as a Value Added Course on 27-28 th Sept, 2018. This course included discussions and demonstrations of Intramuscular and Intravenous Injection Techniques followed by students performing these techniques under observation. Certificates were awarded to the participants after completion of the course.

Subject: Value added course on "ETHICS IN BIOMEDICAL RESEARCH"

Dear faculty and students,

We are pleased to announce the commencement of a workshop titled "ETHICS IN BIOMEDICAL RESEARCH" at DY PATIL DENTAL SCHOOL. The course aims to supplement the existing curriculum by offering additional knowledge and practical skills that will further enrich the learning journey of our students.

Please find the details of the course:

Title: ETHICS IN BIOMEDICAL RESEARCH

Duration: 3 days

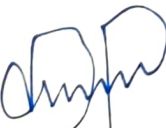

Venue: DY PATIL DENTAL SCHOOL

Schedule: 29/08/19 to 31/08/19

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

Ethics in Biomedical Research

Introduction:

Creation and dissemination of knowledge through research is one of the core functions of the higher learning institutions. Apart from generating new knowledge, the higher learning institutions, particularly the universities also have the responsibility of training the intellectual manpower required for all sectors of the society.

Quality of manpower is the most important factor for producing good quality researchers. With the passage of time, research as an activity has not received due attention in higher education institutions. Research is considered as a prerequisite for obtaining the degree only. Lack of adequate infrastructure, resource constraints, lack of motivation coupled with a few other factors do not encourage the meritorious students to take up research as a career option. As a result, the quality of the research conducted in higher education institutions has projected a declining trend. This has raised a concern among the academic community, social thinkers and policy makers.

Amongst all other factors, training of the researchers is the most crucial one. At present, in most of the higher education institutions, except a few disciplines, there is no adequate provision of training on research methodology. The research students often depend upon the supervisor/guide for even finding a suitable research problem. They also find it difficult to proceed further independently. To improve the situation there is a need for providing training on research methodology to the young scholars. Research is the systematic and objective process of gathering, recording and analysing data for taking appropriate & meaningful decisions. It connotes patient study and scientific investment, wherein the researcher takes a more careful look at data to discover all that could be known more deeply about the subject under study. Applied research facilitates managerial decision-making and reduces uncertainty. To keep pace with the recent advancement in any discipline, one has to be well versed with the latest developments in research methodology. Keeping in view the importance of research methodology, Value-added course on Research Methodology & Data Analysis aims to explore the basic dimensions of research and the concomitant need for participants to rethink about the assumptions that underlie historic paradigms of research in the field of science.

The course is designed to offer the participants with hands-on approach to conduct research. On completion of the course, participants are likely to have developed the skills to review the literature, develop hypotheses, frame research design, identify sampling techniques and comprehend the role and relevance of the tools for data collection and analysis. The three-day course will expose the participants to a brief theoretical as well as practical input. The participants are expected to bring their research problem & data if they have to work on during

the workshop and at the end; they would perform data analysis independently and would make a presentation before the class.

Objectives of the Course:

At the end of this course participants will be able to (30 credits hours):

1. Fundamentals in Research Methodology.
2. Practical sessions with Suitable Illustrations and Demonstrations.
3. Coverage of Analysis Techniques.
4. Sampling Design and Analysis Techniques.
5. Exposure of Data Analysis Techniques by SPSS.
6. Discussion on the Interpretations of Results and Presentation

Expected Learning Outcomes

1. Understanding of Research Concepts & Methodology.
2. Choose the Right Statistical Technique for Different Research Questions.
3. Analyse Data using Basic and Advance Statistical Techniques in Statistical Software.
4. Interpret Analysis Output Tables and Report Findings for Publishing

Course Content;

1. Introduction to research
2. Introduction to Qualitative Research
3. Concept mapping and formulation of research problems
4. Type of research design
5. Introduction to quantitative research
6. Secondary data Collection (Tools & Techniques)
7. Primary data Collection (Tools & Techniques)
8. Testing null hypothesis
9. Reliability and Validity
10. Sampling
11. Questionnaire design and testing
12. Testing hypothesis
13. Inferential Statistics

Schedule:

Dear faculty & Students,

We are pleased to announce the commencement of a workshop titled " Basic Root Canal Treatment For Day-To-Day Clinical Practice " at DY Patil Dental School. This course is designed to enhance your clinical skills and competencies in the field of restorative dentistry and prosthodontics.

Please find below the details of the course:

Course Title: **Basic Root Canal Treatment For Day-To-Day Clinical Practice**

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 8th February 2018 to 10th February 2018

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Basic Root Canal Treatment For Day-To-Day Clinical Practice-Workshop.

INTRODUCTION: This course provides the comprehensive knowledge and practical skills in using the Hand instrumentation in root canal procedures. This program is tailored for dental students to understand conventional root canal procedures by using Hand instruments into their practice. The course covers essential concepts, techniques, and hands-on training to optimize root canal procedures.

Indications:

- The students who have recently been posted in department of Conservative Dentistry and Endodontics.
- The students who want to learn basic concepts in conventional root canal therapy.

Objectives:

To educate dental interns on using Hand instruments and techniques for efficient and effective cleaning, shaping and Obturation of root canals during endodontic procedure. It aims to enhance their skills in performing root canal treatment with precision and minimizing procedural errors.

Learning Outcome:

- Manual techniques provide a better sense of tactile sensitivity.
- Enhanced skill and experience in conventional root canal therapy.

Course content:

1 st Day	Introduction to Hand Files, Isolation and special emphasis on Rubber dam
2 nd Day	Access cavity preparation
3 rd Day	Cleaning, Shaping & Obturation

Schedule:

The course will be conducted over 3 days from 8th February 2018 to 10th February 2018 at the department of Conservative Dentistry and Endodontics. The course consists of interactive

lectures, case presentation & group discussion with case scenarios, live demonstration & hands on.

Attendance:

Attendance for all sessions is mandatory. Participants are required to attend each session punctually.

Certificate:

Participants who successfully complete the course and fulfil the attendance requirements will be awarded a certificate of completion.

Schedule: Basic Root Canal Treatment For Day-To-Day Clinical Practice

Sr No	Topic	Method	Facilitator	Date	Time
1	Fundamentals of root canal treatment 1: Introduction to root canal treatment 2: Introduction to Hand Files 3: Isolation and special emphasis on Rubber dam	Lectures & Group Discussion with Case Scenarios	Dr Kiran Dr Nandita Dr Nandita	8/3/2018	9-12.30
2	Access cavity Preparation 4: Introduction to access cavity (Crowns and Bridges) 5: Fundamentals of access cavity (Inlays, Onlays, and Veneers) 6: Details of Access cavity	Live demonstration & Hands On	Dr Kiran Dr Nandita Dr Nandita	9/3/2018	9-12.30
3	Cleaning, Shaping and Obturation 7: Fundamentals of cleaning and shaping 8: biomechanical preparation techniques	Lectures & Group Discussion with Case Scenarios	Dr Kiran Dr Nandita	10/3/2018	9-12.30

	9: Obturation methods and techniques		Dr Nandita

Date: 08/01/2018

Subject: Lecture & Workshop on – “Extra-oral Radiography”

Dear faculty & students,

We are pleased to announce the commencement of a Lecture with workshop titled “Extra-oral Radiography” at DY Patil Dental School. This workshop is designed to enhance knowledge and skills and competencies in the Extra-oral Radiographic Techniques.

Please find below the details of the workshop:

Workshop Title: Extra-oral Radiography

Duration: 3 days

Venue: DY Patil Dental School

Schedule: 16th January to 18th January 2018

Attendance: Attendance for all sessions is mandatory.

We look forward to your active participation in this valuable learning opportunity.

Sincerely,

Dr. Anand Shigli

Dean

DYPDS, Lohegaon

DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

Lecture & workshop:

EXTRAORAL RADIOGRAPHY

Workshop title: Extra-oral radiography

Introduction:

Extra-oral radiograph is defined as examination made of the head and facial region using film located outside the mouth.

- They allow the dentist to view large area of the jaw and skull on a single radiograph not covered by intraoral film

Indications:

- Useful for evaluating large area of skull and jaws.
- Diagnosis of large pathologies in orofacial region.

Objective:

The primary objective of this course is to equip participants with the knowledge and skills necessary with the practical technique required to take extra-oral radiographs. With the help of this workshop, the participants would have an understanding regarding application of theoretical knowledge required while practically taking the extraoral radiograph.

Learning Outcome:

Upon completion of the course, participants will be able to

- Understanding of Extraoral Radiography Techniques like OPG, lat ceph, PA mandible and PA water's view
- Knowledge of Equipment and Technology
- enable students to develop basic skills in interpreting extraoral radiographs
- Patient Management and Communication

Course content:

1. Introduction to Extraoral Radiography
2. Types of Extraoral Radiography Techniques
3. Components of extraoral radiography machines
4. Imaging Procedures and Techniques
5. Basics of radiographic anatomy seen in extraoral radiographs
6. Role of extraoral radiography in different dental specialties

Schedule:

The course will be conducted over 3 days on 16th January to 18th January 2018 at D.Y. Patil Dental School, Lohegaon, Pune.

EXTRAORAL RADIOGRAPHY

SR NO.	TOPIC	METHOD	FACILITATOR	DATE	TIME
1.	Theory discussion(OPG)	Lectures and group discussions	Dr. Anagha Shete	16/01/2018	9:00 am - 12:00 pm
	OPG demo and Practice of X-ray	Demonstrations			1:00 pm - 4:00pm
2.	Theory discussion (Lat ceph)	Lectures and group discussions	Dr. Tejas Kulkarni	17/01/2018	9:00 am - 12:00 pm
	Lat ceph demonstration	Demonstrations			1:00 pm - 4:00pm
3.	Theory discussion (PA mandible view)	Lectures and group discussions	Dr. Ashwini Nerkar	18/01/2018	9:00 am - 12:00 pm
	PA mandible view	Demonstrations			1:00 pm - 4:00pm

Program Report 2018-2019	
Name of Course	Extraoral Radiography
Category	Lecture and Workshop
Date of Course	16 th to 18 th January 2018
Contact Hours	18 hours
Coordinator	Dr. Anagha Shete
Participants	43
Program Content	<p>The department of oral medicine and radiology conducted a program on extraoral radiography which included lectures and workshop. This course offered a comprehensive understanding on extraoral radiography that combines theoretical knowledge with practical skills.</p> <p>COURSE HIGHLIGHTS:</p> <p>Panoramic Radiography: Hands-on practice in patient positioning and image acquisition.</p> <p>Cephalometric Imaging: Techniques for landmark identification and diagnostic use in orthodontics</p> <p>PA mandible and PA waters view: Hands-on practice in patient positioning and image acquisition.</p> <p>Interactive Learning: Engaging sessions with practical exercises and real-world scenarios</p> <p>Radiation Safety: Essential protocols and practices for minimizing exposure risks.</p> <p>The course saw significant participation from interns, who gained deeper insights into extraoral radiography. This training aimed to elevate their practical skills and theoretical knowledge.</p>
