Dr. D Y Patil Knowledge City, Charholi Bk, Via Lohegaon, Pune 412105

Affiliated to Maharashtra University of Health Sciences, Nashik

Recognized by Dental Council of India

SELF STUDY REPORT (CYCLE 1) 2018-2023

Criteria 7: Institutional Values and Best Practices

Key Indicator: 7.1 Institutional Values and Social Responsibilities

Metric: 7.1.5: Water conservation facilities available in the institute

**INSTALLATION AND MAINTENANCE REPORTS OF WATER
CONSERVATION FACILITIES AVAILABLE IN THE INSTITUTE**

INDEX

Sr. no.	Data	Page
1	Rainwater harvesting	5
2	Borewell /Open well recharge	7
3	Construction of tanks and bunds	9
4	Wastewater recycling	17
5	Maintenance of water bodies and distribution system in the campus	25

RAINWATER HARVESTING

ROHIT BURDE
CIVIL CONTRACTOR

Bill No :- 06

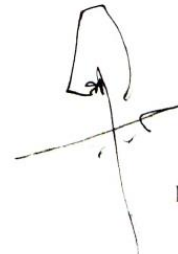

DATE :- 04/05/2021

To,
Dr. D. Y. Patil Dental School
Charoli Bk Via Lohegaon,
Pune- 4121

Sub – Bill About Rainwater Harvesting Work.

Sr.No.	DESCRIPTION	UNIT	RATE	Qty	AMOUNT
1	Excavation work for rainwater harvesting tank with the help of JCB and Breaker. Shifting all murum with the Help of labor tractor trolley (Including Fuel and operator charges) BBM work for Tank (including all material and labor charges) Installing RCC Slab On Tank (material and labor cost inclusive)		-	-	1,37,000.00
				TOTAL	1,37,000.00

IN WORDS – ONE LAKH THIRTY SEVEN THOUSAND RUPEES ONLY.

For Rohit Burde

WASTEWATER RECYCLING

TO WHOMSOEVER IT MAY CONCERN

This to inform that Ajeenkya DY Patil Knowledge City Campus constitutes of Ajeenkya DY Patil University, DY Patil International School, and Institutes under Dr D Y Patil Educational Enterprises Charitable Trust such as DY Patil Dental School, Dr. Ajeenkya DY Patil School of Engineering, Dr DY Patil School of Management, Dr DY Patil School of MCA and Dr DY Patil School of Architecture.

Our campus includes the following facilities that we share in common:

- 1) Alternate Sources of Energy & Energy Conservation
 - Solar Energy
 - Wheeling to the Grid
 - Sensor based energy conservation.
 - Biogas Plant
- 2) Water conservation facilities like
 - Rain water harvesting
 - Borewell
 - Waste water harvesting recycling (STP)
 - Maintenance of water bodies
- 3) Green Campus
 - Battery powered vehicles
 - Plastic free campus
 - Waste Segregation Unit
- 4) Sports Facilities
 - Cricket Grounds
 - Badminton Court
 - Basket ball Courts
 - Tennis court , etc
- 5) Yoga Facilities 6) Canteens 7) Auditorium 8) Parking Facilities 9) Hostels
- 10) Security 11) ATM 12) Ajeenkya Co-operative Society

Most of these facilities are paid either from Ajeenkya D Y Patil Infra Private Limited or from Dr D Y Patil Educational Enterprises Charitable Trust or any group entities, so the invoices may be in other entities name, but the amenities are available equally to all the Institutes in the Ajeenkya DY Patil Knowledge City.

Certified as True

D Y PATIL DENTAL SCHOOL
Affiliated to the Maharashtra University of Health Sciences, Nashik
Recognized by Dental Council of India

Details of existing sewage treatment Plant (STP) in the premises of Ajeenkya D.Y. Patil Knowledge City, Lohegaon

1) Sewage Treatment Plant:

The flow diagram of Sewage treatment Plant and the treatment method is explained below.

- The sewage is generated in the premises of Ajeenkya D.Y. Patil Knowledge City Campus from all school and colleges buildings including building of D.Y. Patil Dental School along with wastewater from Central Canteen.
- The combined waste is then treated by Aerobic Sewage Treatment Plant of capacity equal to 300000 litres per day.
- The raw sewage is first collected into collection tank is then passed on to Equalization tank via Screen to remove rubbish matter and to normalize the pH of the flow.

D Y PATIL DENTAL SCHOOL

Affiliated to the Maharashtra University of Health Sciences, Nashik
Recognized by Dental Council of India

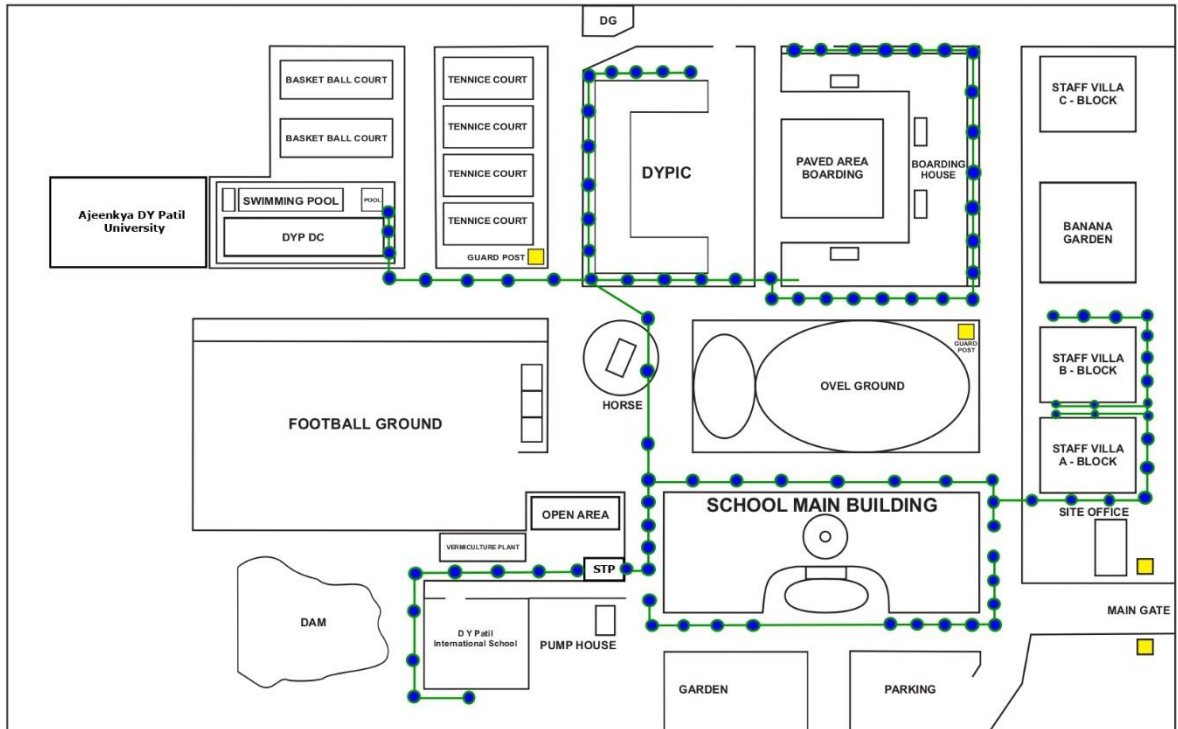

- The sewage is then pumped from equalization tank to Aeration tank by 1 no. of separate pumps (100% standby) for longer duration to develop effective aerobic bacteria culture to digest the organic matter in the sewage.
- The aerated sewage is then passed into settling tank to separate sludge from the treated water. While sludge accumulated in hopper bottom of settling tank is recirculated in the system, the SUPERNATANT is then disinfected with Sodium Hypo chloride and passed into Pressure filter for filtration.
- The filtered sewage is passed through Activated Carbon treatment unit to adsorb remaining organic matter and remove odour and colour.
- The finally treated water is collected in separate sump and is left into two outlets viz. for reuse in Garden and for land disposal in the premises.
- The STP is running at its best efficiency since there is no smell generated and the Biochemical Oxygen demand and Suspended solids (SS) of finally treated sewage are within the permissible range of 20 mg/litre and 30 mg/lit respectively as per IS 6908-1975.
